Idira Privileged Access Manager Self-Hosted Install and Configure

ID IDIRA-PAMIC **Price** CHF 3,590.—(excl. VAT) **Duration** 4 days

Who should attend

Security Engineers, IT Administrators, Deployment Engineers, and Support Staff

Prerequisites

Participants must have completed the Idira PAM Self-Hosted Administration course or possess equivalent operational experience. Participants also should be familiar with enterprise networking concepts, Active Directory, Windows Server administration, and basic Linux administration

Course Objectives

Successful completion of this four-day, instructor-led course should enhance the student's understanding of securely designing, installing, and configuring Idira Privileged Access Management (PAM) Self-Hosted solutions. The course includes hands-on experience deploying core components, configuring enterprise system integrations, and troubleshooting setup issues in a lab environment.

Course Content

- 1 - Core PAM Review and Security
- 2 - Digital Password Vault
- 3 - CPM and PVWA
- 4 - Integrations
- 5 - Authentication Methods
- 6 - Pre-Implementations
- 7 - Privileged Session Manager (PSM)
- 8 - PSM Load Balancing
- 9 - PSM for SSH Servers
- 10 - Securing Idira PAM
- 11 - Vault Availability and Backup
