

## WebSphere Application Server V8.5.5 Administration (WA855G)

**ID** WA855G **Preis** CHF 4'650.– (exkl. MwSt.) **Dauer** 5 Tage

### Zielgruppe

This intermediate course is designed for administrators who install, configure, and manage web-based applications on WebSphere Application Server. Web administrators, lead application developers, and application architects can also benefit from this course.

The course is applicable to users running WebSphere Application Server on various platforms including IBM i systems.

### Voraussetzungen

You should have:

- An understanding of basic internet concepts
- Experience in using a web browser
- Administrative skills for a web server, such as IBM HTTP Server or Apache
- Basic operational skills for the Linux operating system

### Kursziele

An updated version of this course is available. For more information, click WebSphere Application Server V9 Administration (WA590G).

This course is also available as self-paced virtual (e-learning) course WebSphere Application Server V8.5.5 Administration (ZA855G). Please note that this option does not require any travel.

This course teaches you the skills that are needed to install and administer IBM WebSphere Application Server V8.5.5. This release offers users enhanced support for standards, emerging technology, and a choice of development frameworks.

In this course, you learn how to install, configure, and maintain IBM WebSphere Application Server V8.5.5 base, Network Deployment (ND), and the Liberty profile. You learn how to deploy enterprise Java applications in a single computer or clustered configuration.

In addition, you learn how to work with features of WebSphere Application Server V8.5.5, such as IBM Installation Manager, WebSphere Customization Toolbox, security enhancements, Intelligent Management, and centralized installation.

Throughout the course, hands-on exercises and demonstrations reinforce lecture content and give you practical experience with WebSphere Application Server V8.5.5. You complete tasks such as installing and assembling applications, applying problem determination techniques, configuring a clustered environment, and working with fine-grained administrative security.
