

Machine Learning Security (MLSEC)

ID MLSEC Preis auf Anfrage Dauer 4 Tage

Zielgruppe

Python developers working on machine learning systems

Voraussetzungen

General machine learning and Python development

Kursziele

- Getting familiar with essential cyber security concepts
- Learning about various aspects of machine learning security
- Attacks and defense techniques in adversarial machine learning
- · Identify vulnerabilities and their consequences
- Learn the security best practices in Python
- Input validation approaches and principles
- Managing vulnerabilities in third party components
- Understanding how cryptography can support appplication security
- Learning how to use cryptographic APIs correctly in Python
- Understanding security testing methodology and approaches
- Getting familiar with common security testing techniques and tools

Kursinhalt

- Cyber security basics
- · Machine learning security
- Input validation
- · Security features
- Time and state
- Errors
- Using vulnerable components
- · Cryptography for developers
- · Security testing
- Wrap up
