

## Machine learning security (Python) (MLSEC-P)

**ID** MLSEC-P **Preis** CHF 3'000.– (exkl. MwSt.) **Dauer** 4 Tage

### Zielgruppe

Python developers working on machine learning systems

### Kursziele

- Getting familiar with essential cyber security concepts
- Learning about various aspects of machine learning security
- Attacks and defense techniques in adversarial machine learning
- Input validation approaches and principles
- Identify vulnerabilities and their consequences
- Learn the security best practices in Python
- Managing vulnerabilities in third party components
- Understanding how cryptography supports security
- Learning how to use cryptographic APIs correctly in Python

### Kursinhalt

- Cyber security basics
- Machine learning security
- Input validation
- Security features
- Time and state
- Errors
- Using vulnerable components
- Cryptography for developers
- Wrap up

# Machine learning security (Python) (MLSEC-P)
