

Optimizing Storage Services for Applications with XtremIO (MR-1CP-XIO4APPS)

ID MR-1CP-XIO4APPS Preis auf Anfrage Dauer 3 Tage

Zielgruppe

This course is intended for professionals responsible for implementing, managing and supporting XtremIO storage systems.

Voraussetzungen

Enter prerequisite skills and knowledge

- XtremIO foundational knowledge
- Connectivity protocols: IP, FC, iSCSI
- Basic understanding of Windows, UNIX and other operating systems
- Virtualized data center concepts
- FC and iSCSI SANs
- Storage network troubleshooting and performance concepts
- Specific application architecture and functionalities – Oracle and VDI
- Data protection and Business Continuity fundamentals

Kursziele

Upon successful completion of this course, participants should be able to:

- Describe proper configuration and integration of XtremIO systems for end to end communication and all points in between
- Obtain maximum availability from a solution by properly configuring replication and proactive monitoring through alerts and basic troubleshooting
- Analyze workloads and optimize for maximum performance thresholds
- Create custom reports to determine patterns and confirm with SLA guidelines
- Describe data protection capabilities of XtremIO using RecoverPoint, VPLEX, and AppSync
- Describe integration best practices for VDI and Oracle environments

Kursinhalt

The content of this course is designed to support the course objectives.

XtremIO Overview and Access Requirements

- Components, models and resources
- XtremIO Management Server

XtremIO Cluster Management Interface

- Accessing XtremIO storage management applications (GUI, CLI)
- Management through REST APIs and Plugins

XtremIO Storage Presentation

- Storage presentation and volume management
- Host configuration – Windows, Linux, ESXi, Solaris, AIX, and HP-UX
- Connectivity Zoning best practices

XtremIO Snapshots

- Snapshot features, capabilities, and operations

XtremIO Features and Integration

- Encryption, Compression and Deduplication
- XDP (XtremIO Data Protection)
- Integration with ViPR, ViPR SRM, EMC Connectrix Manager Converged Network Edition (CMCNE)
- Integration with Cisco Data Center Network Manager (DCNM)
- Integration with VMware – VAAI, VSI, Operations Manager
- Microsoft – ODX, ESI, and VSS Plug-in

XtremIO Performance and Reporting

- Performance overview
- XtremIO reports and host tools
- Common performance issues

Optimizing Storage Services for Applications with XtremIO (MR-1CP-XIO4APPS)

XtremIO Data Protection

- RecoverPoint native integration with XtremIO arrays
- RecoverPoint operations and management
- Implementing XtremIO into a VPLEX Cluster

XtremIO Application Integration

- Integration with Oracle environments
- Integration with VDI environments

XtremIO Advanced Management Operations

- Managing alerts and power procedures
- Generating log files, and IP modifications
- Space reclamation and shrinking deduplication rates

In addition to lecture and demonstrations, this course includes labs designed to allow practical experience for the participant.

Optimizing Storage Services for Applications with XtremIO (MR-1CP-XIO4APPS)
