Dell PowerProtect DD System Administration (PPDDSA)

ID PPDDSA **Preis** US $ 4'000.– (exkl. MwSt.) **Dauer** 5 Tage

Zielgruppe

This course is available to all audiences. This course is intended for students who plan on using and administering PowerProtect DD systems.

Voraussetzungen

To understand the content and successfully complete this course, a student must have a suitable knowledgebase or skill set. The student must understand computer storage, networking, and backup concepts.

Kursziele

Upon successful completion of this course, participants will be able to:

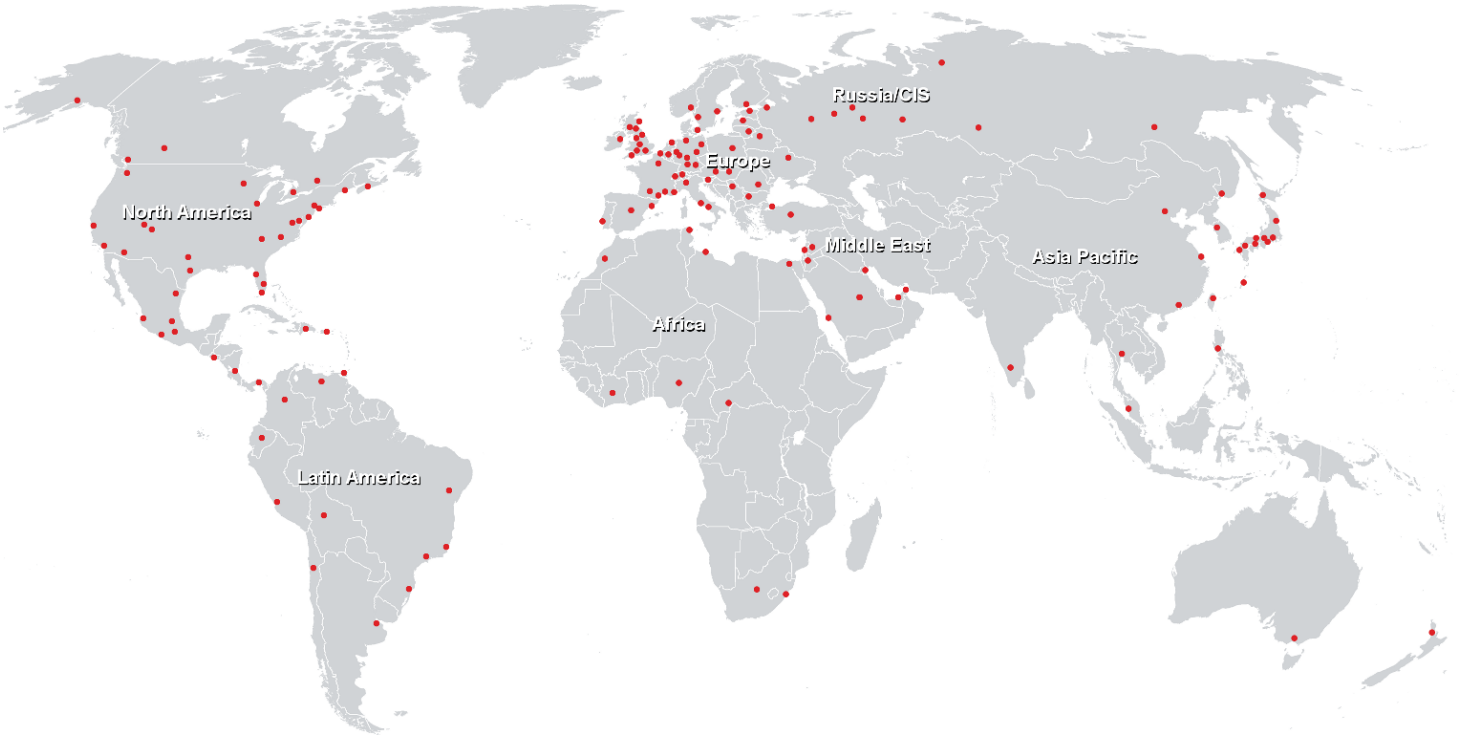

- Monitor a PowerProtect DD system
- Configure and manage PowerProtect DD network interfaces
- Access and copy data to PowerProtect DD system
- Customize and manage a PowerProtect DD deduplication file system
- Describe and perform data replication and recovery
- Describe and configure a PowerProtect DD VTL
- Describe and configure DD Boost
- Perform a DD Boost backup
- Describe capacity and throughput planning
- Describe and configure Secure Multi-Tenancy
- Describe and configure Dell EMC Cloud Tier

Kursinhalt

- PowerProtect DD Basic Administration
- PowerProtect DD Network Interfaces Administration
- PowerProtect DD CIFS and NFS Implementation and Administration
- PowerProtect DD File System and Data Management
- PowerProtect DD Data Replication Implementation and Administration
- DD Boost Implementation and Administration
- PowerProtect DD Virtual Tape Library Implementation and Administration
- Cloud Tier Implementation and Administration
- PowerProtect DD Data Security Implementation
- PowerProtect DD Secure Multi-Tenancy Implementation and Administration
- PowerProtect DD Capacity and Throughput Planning and Monitoring
