IBM Network Performance Insight 1.3.1 Installation and Configuration (TN530G)

ID TN530G **Preis** auf Anfrage **Dauer** 4 Tage

Zielgruppe

This course will be useful to implementers, administrators, technical sales persons, and any others who need IBM Network Performance Insight skills.

Voraussetzungen

Linux administration skillsA working knowledge of IBM Netcool Operations InsightA general knowledge of IP network monitoring methods, such as SNMP, IP Flow, IP SLA

Kursinhalt

IBM Network Performance Insight is a network performance monitoring system. It offers real-time and historical trends in network performance and interactive views of network data that help reduce network downtime and optimize network performance. Network Performance Insight provides IBM Netcool Operations Insight with comprehensive IP network device performance monitoring and traffic analysis. In this 3-day course, you learn how to install IBM Network Performance Insight and integrate it with IBM Netcool Operations Insight. This course is lab-intensive, with an emphasis on hands-on exercises.

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the Self-Paced Virtual Classes and Web-Based Training Classes on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course. http://www.ibm.com/training/terms
