

IBM Access Manager Platform Foundations (TW107G)

ID TW107G **Preis** CHF 3'150.– (exkl. MwSt.) **Dauer** 3 Tage

Zielgruppe

This course is designed for system administrators and implementors interested in learning IBM Access Manager.

Voraussetzungen

Before taking this course, make sure that you have the following skills:

- Familiarity with LDAP, TCP/IP and HTTP
- Familiarity with the Linux command-line
- Basic knowledge of JavaScript
- Working knowledge of security concepts, including SSL, authentication, and authorization

Kursinhalt

IBM Access Manager is a highly scalable and configurable access management solution. It simplifies and secures your user experience with single sign-on across applications and protects critical assets using strong multi-factor authentication and risk-based access.†You can use IBM Access Manager to adopt secure web, mobile, and cloud technologies and simplify access management for your employees and consumers. Using the skill taught in this course, you will be able to configure authentication and authorization mechanisms, implement policy access control, and set up reverse proxy junctions to process web requests.
