

Process Implementing with IBM Business Process Manager Standard/Adv V8.5.6 - II (WB820G)

ID WB820G Preis CHF 5'200.– (exkl. MwSt.) **Dauer 5 Tage**

Zielgruppe

This intermediate course is designed for process application developers with experience in implementing IBM Business Process Manager, or other project team members who design, architect, and build complex process applications.

Voraussetzungen

You should have:

- Successfully completed course Process Implementing with IBM Business Process Manager Standard/Adv V8.5.6 - I (WB819G)
- Built and deployed at least one IBM Business Process Manager process application release into production

Kursziele

An updated version of this course is available. For more information, click Process Implementing with IBM Business Process Manager Standard V8.5.7 - II (WB824G).

This course is also available as self-paced virtual (e-learning) course Process Implementing with IBM Business Process Manager Standard-Adv V8.5.6 - II (WB820G). This option does not require any travel.

This course teaches application developers and BPM team members how to use IBM Business Process Manager to design and develop process applications. It is an interactive class with demonstrations and hands-on lab exercises.

This course teaches methods for designing and building complex process application solutions with IBM Business Process Manager. IBM Business Process Manager is a comprehensive BPM product that provides the visibility and insight necessary to effectively manage organizational business processes. This course focuses

on the Standard configuration of IBM Business Process Manager.

The course begins by explaining how to extend process visibility beyond process participants to managers and executives. This visibility is realized through reports that provide real-time productivity and historical performance trends. The course also covers how a process application incorporates rich user interactivity without sacrificing user response time. You also learn how to integrate disparate systems and data sources through inbound and outbound integrations.

Hands-on exercises throughout the course give you the opportunity to develop a process application that enhances the function, usability, performance, and maintainability of a business process.

The lab environment for this course uses the Windows operating system.
