

Developing Applications in IBM Business Process Manager Advanced V8.5.7 - I (WB860G)

ID WB860G **Preis** CHF 4'650.– (exkl. MwSt.) **Dauer** 5 Tage

Zielgruppe

This course is designed for system administrators, integration specialists, application developers, business process developers, support engineers, and technical sales and marketing professionals.

Voraussetzungen

Before taking this course, you should have:

- Basic Java and Java Platform, Enterprise Edition (Java EE) skills
- Basic Extensible Markup Language (XML) skills

Successful completion of course Process Implementing with IBM Business Process Manager Standard/Adv V8.5.6 - I (WB819G) is highly recommended, but not required.

Kursziele

This course teaches you how to use the tools in IBM Business Process Manager Advanced V8.5.7 to build and deploy process integration solutions.

IBM Process Server supports a service-oriented architecture (SOA) by providing a platform for using diverse technologies to integrate business applications. In this course, you learn how IBM Process Server enables business integration applications to define business logic and processes based on Web Services Business Process Execution Language (WS-BPEL), and business rules. In the intensive hands-on lab exercises, you design, develop, and test a comprehensive business integration solution. You use the IBM Integration Designer tool to create business integration solutions by using the Service Component Architecture (SCA) programming model, the Service Data Objects (SDO) data model, and the mediation flow programming model.
