Kursziele

- Splunk deployment planning
- Index and resource planning
- Clustering Overview
- Forwarder and Deployment
- Integration
- Performance Monitoring and Tuning
- Use Cases

Kursinhalt

This 9-hour course is for architects and others tasked with

implementing and managing large enterprise deployments. The course covers Splunk deployment planning, Index and resource planning, an overview of Splunk clustering, forwarder selections and forwarder management, integration with other Splunk and third-party products, performance monitoring and tuning, and Splunk use cases.

Please note that this course may run over three days, with 4.5 hour sessions each day, as per Splunk.

For a more condensed course experience, Fastlane does schedule this class for two days.
