## Kursinhalt

This course is for for experienced on-prem administrators and anyone needing to ramp-up on Splunk Cloud to get more knowledge and experience of managing Splunk Cloud instances.

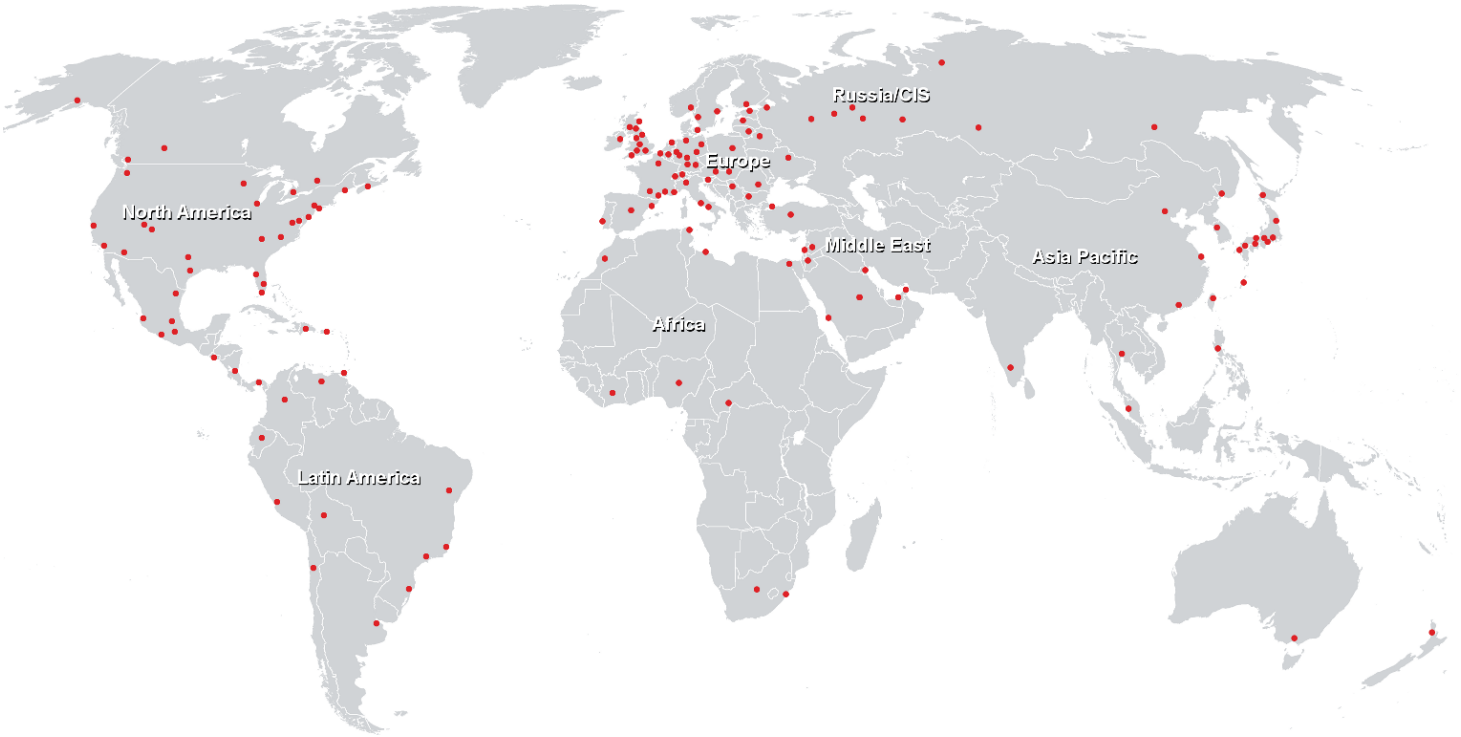

The course discusses the differentiators between on-prem Splunk and the different Splunk Cloud offerings. Modules include topics on how to migrate data collection and ingest from on-prem Splunk toSplunk Cloud as well as highlighting Splunk Cloud specific differences and best practices to manage a productive Splunk SaaS deployment. For Splunk Administrators who have undertaken the System and Data Administration learning pathways, this course highlights key differences between Splunk Enterprise deployed on-premises and Splunk Enterprise Cloud to allow to ramp up their data and system management skills to transition to Splunk Cloud. The hands-on lab provides access to and experience of managing a Splunk Cloud instance.

Note: Splunk Cloud Administration and Transitioning to Splunk Cloud SHOULD NOT be taken together as both are designed to develop Splunk Cloud-specific skills and as such there is some overlap.

**Please note that this course may run over two days, with 4.5 hour sessions each day.**
