

AI+ Educator (AIED)

ID AIED Price on request Duration 1 day

Prerequisites

- Educational Background: Basic understanding of educational theories and practices.
- Technology Engagement: Familiarity with digital tools and educational technology.
- Curriculum Development: Some experience in lesson planning and curriculum design.
- AI Curiosity: Interest in the potential and application of AI in education.

Course Objectives

- **Ethical Decision-Making skills**
 - Students will learn how to identify and handle ethical, bias, and sustainability issues in AI education. This involves critically analyzing AI systems, promote fairness, transparency, and accountability, and advocate for ethical AI in education.
- **Curriculum Integration and Instructional Design**
 - Students will learn how to integrate AI technologies into educational curriculum. This includes matching AI-based educational resources and activities with learning objectives, creating engaging and interactive learning experiences, and developing students' computational thinking and problem-solving skills using AI.
- **Data Literacy and Analysis for Educational Insights**
 - Participants will gain data literacy and analysis abilities needed to use AI in education. This involves AI tools to collect, analyze, and understand educational data, extract valuable insights to influence decision-making, and tailor learning experiences depending on student performance and needs.
- **Project Management with AI Tools**
 - Students will receive practical experience with several AI tools and platforms, which includes administrative operations, and assessment and feedback. This practical experience will help in using AI to solve educational problems.
