

AI+ Learning & Development (AILD)

ID AILD Price on request Duration 1 day

Prerequisites

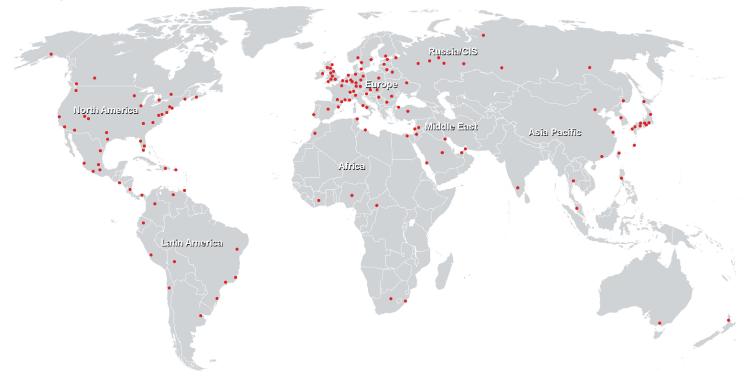

- A basic understanding of artificial intelligence concepts and terminologies
- Proficiency in using digital tools and platforms for educational purposes
- Familiarity with learning theories and instructional design principles
- Some experience in educational or training roles, such as teaching, content development, or instructional design
- A willingness to engage with technical subjects and apply AI technologies in the context of learning and development

Course Objectives

- AI Content Development
 - Learners will gain the ability to use AI for creating and curating educational content, leveraging AIdriven tools to tailor and optimize learning materials.
- Implementation of Adaptive Learning Systems
 - Students will develop skills in designing and implementing adaptive learning systems that use AI to customize the educational experience based on individual learner's needs and performance.
- Application of NLP in Educational Settings
 - Learners who will go through this course will get skills in natural language processing to analyze and understand educational content, enhancing interactions between learners and digital educational platforms.
- Educational Data Mining and Analytics
 - Learners will explore techniques in data mining and analytics to understand patterns and trends in student learning behaviors, performance, and engagement. This knowledge enables the development of more effective educational strategies and personalized learning experiences, helping educators and institutions to enhance outcomes and optimize educational processes.
