Fast Lane

Arista Cloud Engineer: Level 5 - Cloud Automation (ACE-L5)

ID ACE-L5   **Price** on request   **Duration** 5 days

Who should attend

The ACE Level 5 course is best suited for individuals with more than 5 years of experience in the Network Engineering field. Prior exposure to the basics of Python, Ansible and CloudVision are needed as this is not a beginner level course. Mid-to-senior level Network Engineers and Operations staff will find the skills most often searched for by corporations for these positions. Those individuals holding current or expired Professional certifications in other vendor programs will find a refreshed and updated approach. ACE:L5 focuses on the features and skills needed in advanced networks. You will not waste energy learning outdated technologies, approaches or tasks no longer used in open networks.

Course Content

The ACE Level 5 course is designed to give modern network engineers, architects and operations staff the needed skills to automate an Arista infrastructure. The focus of the course is mid-level programmability leveraging Ansible, Python and other commonly used automation languages. Advanced CloudVision capabilities will be explored to give the engineer a comprehensive set of tools and strategies to automate any Arista environment. This course is an extensive hands-on workshop format.
