Configuring HPE Aruba Networking SD-Branch (CASDB)

ID CASDB **Price** 3,300.— €(excl. VAT) **Duration** 4 days

Who should attend

Typical candidates for this course are IT professionals who deploy distributed small-to-medium scale branch networks. The ideal candidate will have previous experience installing, configuring, and managing HPE Aruba Networking Instant APs and switches with HPE Aruba Networking Activate and HPE Aruba Networking Central. HPE recommends that students have at least an understanding of HPE Aruba Networking Central as well as VPN networks, routing, and branch office networks.

Course Objectives

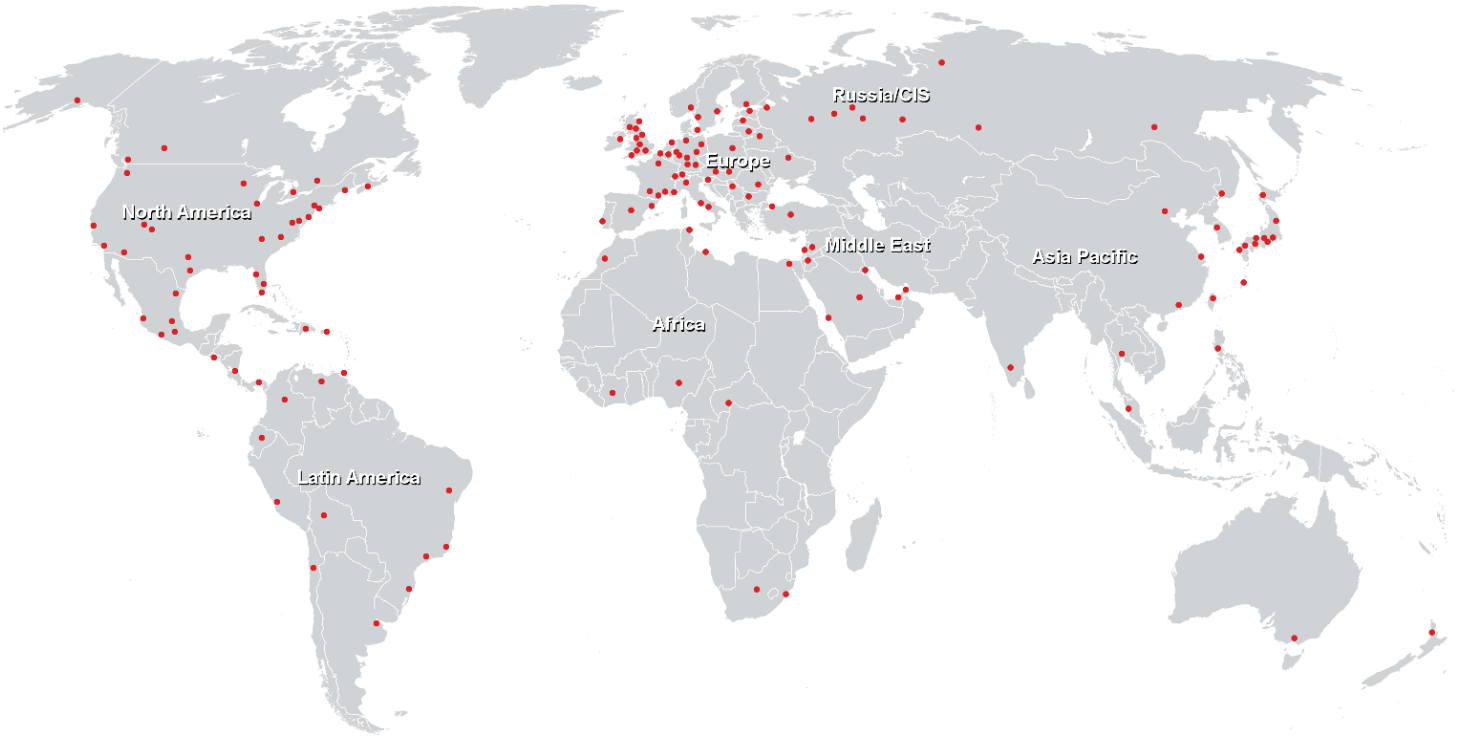

After you successfully complete this course, expect to be able to:

- Describe the Secure Access Service Edge (SASE) framework with HPE Aruba Networking
- Design and deploy EdgeConnect SD-Branch solution
- Explain the EdgeConnect SD-Branch features and components
- Design and deploy EdgeConnect Microbranch
- Describe the Secure Service Edge (SSE) architecture
- Integrate EdgeConnect SD-Branch with HPE SSE

Course Content

- SASE with HPE Aruba Networking
- HPE Aruba Networking gateways
- SD-LAN
- Tunnel and route orchestration
- SD-WAN features
- HPE Aruba Networking Microbranch
- Secure Service Edge (SSE)
