

## Monitoring with Cloudera Observability (ADMIN-231)

ID ADMIN-231 Price on request Duration 1 day

### Who should attend

This course is ideal for new and existing Cloudera Private or Public Cloud users seeking to leverage the benefits of Cloudera Observability. The course is particularly valuable for platform administrators, data practitioners, budget owners/controllers, and solutions architects. A general knowledge of monitoring concepts is helpful.

### Course Objectives

Participants will develop the following skills:

- Comprehend the benefits of Cloudera Observability.
- Configure Cloudera Observability for CDP Public Cloud.
- Understand Cloudera Observability deployment architecture for both CDP
- Public and Private Cloud environments.
- Determine system requirements for workload clusters.
- Install Cloudera Observability.
- Classify workloads for analysis using Workload Views.
- Manage user access to workloads.
- Configure cost center criteria within Cloudera Observability.
- Set up action alerts for jobs and queries using Auto Actions.
- Utilize Cloudera Observability Metastore Analytics.
- Troubleshoot effectively with Cloudera Observability.

### Course Content

#### Introduction

- What is Cloudera Observability
- Cloudera Observability Capabilities

#### Cloudera Observability Tech

- Cloudera Observability Online
- Cloudera Observability Air-Gapped
- Strategic Features
- Observability Essential Adoption
- Configuration Tasks for CDP Public Cloud

#### Deployment Architecture for CDP Private Cloud

- Security Considerations
- System Requirements
- Network Port Requirements
- Configuring Telemetry Publisher
- Redacting Data
- Adding a Proxy Server
- Observability Installation

#### Managing Workloads and Users (Self-Service Analytics)

- Auto-Generating Workload Views
- Manually Generating Workload Views
- Managing User Access to Workloads
- Observability Access Roles
- Exercise: Creating Workload Views
- Exercise: Assigning Access Roles in Cloudera Observability

#### Working with Alerts, Costs, & Reports (Financial Governance)

- Analyzing Environment Costs with Cloudera Observability
- Triggering Action Alerts Across Jobs and Queries – Auto Actions
- Working with Cluster Reports
- Exercise: Configuring Cloudera Observability Cost Center Criteria
- Exercise: Creating a Cloudera Observability Cost Center
- Exercise: Displaying Costs Associated with a Cost Center
- Exercise: Creating an Auto Action Event

#### Understanding, Identifying, & Addressing Problems with Cloudera Observability (Service Health Monitoring)

- Analyzing Tables with Cloudera Observability Metastore Analytics
- Validations in Cloudera Observability
- Analyzing Hive Queries
- Exercise: Analyzing Hive Queries
- Exercise: Analyzing Impala Queries

#### Troubleshooting (Expedited Issue Resolution)

- Troubleshooting Abnormal Job Durations
- Troubleshooting Job Durations: Task Duration
- Troubleshooting Failed Jobs
- Troubleshooting with the Job Comparison Feature

## Monitoring with Cloudera Observability (ADMIN-231)

---

- Exercise: Analyzing Spark Jobs
- Exercise: Analyzing MapReduce Jobs

## Monitoring with Cloudera Observability (ADMIN-231)

---
