

Administering Apache Ozone (ADMIN-236)

ID ADMIN-236 **Price** US \$ 3,520.—(excl. VAT) **Duration** 4 days

Who should attend

This advanced course is for administrators who are currently using CDP Private Cloud Base. The course will appeal to technicians, such as data engineers and applications developers, who are migrating data and applications to Apache Ozone. Prior experience of Cloudera Data Platform, to include HDFS, YARN, and Hive, is expected. Students must have access to the Internet to reach the classroom environments, which are located on Amazon Web Services.

Course Objectives

This course teaches the Ozone internal architecture and how to install, use, maintain, monitor, tune, integrate, and test the the Ozone service in a secure environment.

Participants will gain the following skills:

- Understanding the Benefits of Using Ozone
- Installing and Configuring Secure Ozone
- Managing Files and Objects in Ozone
- Performance Tuning and Doing Baseline Tests
- Controlling Replication and Understanding Failover and Recovery
- Performing Maintenance Tasks
- Monitoring Ozone Using Recon Service
- Integrating Hive, Impala, Spark, Nifi, and Flink with Ozone
- Migrating Data from HDFS to Ozone
