
CompTIA SecurityX (Formerly CASP+) (SECURITYX)

ID SECURITYX Price on request Duration 5 days

Course Objectives

Security Architecture

Analyze security requirements in hybrid networks to work toward an enterprise-wide, zero trust security architecture with advanced secure cloud and virtualization solutions.

Governance, Risk, and Compliance

Prove an organization's overall cybersecurity resiliency metric and compliance to regulations, such as CMMC, PCI-DSS, SOX, HIPAA, GDPR, FISMA, NIST and CCPA

Security Operations

Address advanced threat management, vulnerability management, risk mitigation, incident response tactics and digital forensics analysis

Security Engineering and Cryptography

Configurations for endpoint security controls, enterprise mobility, cloud/hybrid environments, and enterprise-wide PKI and cryptographic solutions

Course Content

SecurityX is the only hands-on, performance-based certification for advanced practitioners — not managers — at the advanced skill level of cybersecurity

While cybersecurity managers help identify what cybersecurity policies and frameworks could be implemented, SecurityX certified professionals figure out how to implement solutions within those policies and frameworks.

Unlike other certifications, SecurityX covers both security architecture and engineering

SecurityX is the only certification on the market that qualifies technical leaders to assess cyber readiness within an enterprise, and design and implement the proper solutions to ensure the

organization is ready for the next attack.

SecurityX is the most up to date advanced-level cybersecurity certification on the market

SecurityX covers technical skills in on premises, cloud native, and hybrid environments, governance, risk, and compliance skills, assessing an enterprise's cybersecurity readiness, and leading technical teams to implement enterprise-wide cybersecurity solutions.

SecurityX is compliant with ISO/ANSI 17024 standards and maps to DCWF work roles used by U.S. DoD Directive 8140.03M.

Regulators and government rely on ANSI accreditation, because it provides confidence and trust in the outputs of an accredited program. Over 3 million CompTIA ISO/ANSI-accredited exams have been delivered since January 1, 2011.
