DataCore DCIE Development Training (DCDT)

ID DCDT **Price** on request **Duration** 2 days

Who should attend

Students who have completed the DataCore SANsymphony Administration Course and want to pursue and achieve DCIE Certification.

Prerequisites

Must have completed the Datacore SANsymphony - Administration (SYMV) Course.

Students will need their laptops, as Word and Excel documents must be completed.

Course Objectives

At the end of this training, the student would have completed:

- Reviewed the web based, DCIE Installation Management presentation
- Participated in multiple Problem Determination and Resolution labs
- Instructor mentoring during the following phases:
- Subscribe to the DCIE Installation Documents
- Planning and Pre-Install Documentation
- SANsymphony Installation and Functional Test Plan Documentation
- Deploy the SAN and Software in accordance with current Best Practices
- Review of the documented installation
- Take and Pass the DCIE Assessment Exam
- Candidate is granted DCIE Certification

Course Content

The course modules are each delivered in two parts:

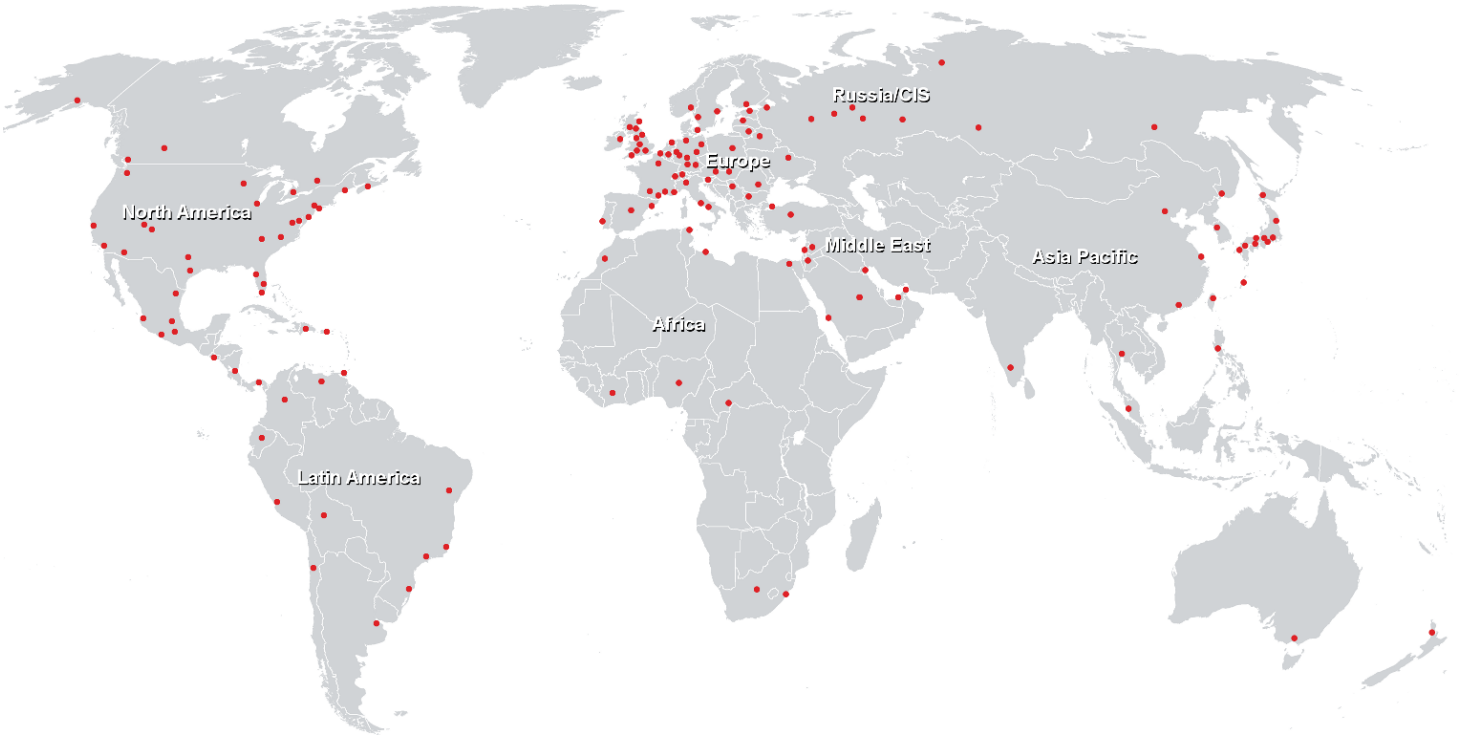

- Lecture
- Hands-on Work with the candidates SANsymphony SAN

Delivery is via a combination of instructor led lecture and hands-on workshops. The workshops provide each student with server access to a SAN.

Each student will follow the DCIE certification steps and be granted DCIE Certification upon completion and passing the DCIE Assessment Exam.
