

## EC-Council Certified SOC Analyst (CSA)

ID CSA Price on request Duration 3 days

### Who should attend

- SOC Analysts (Tier I and Tier II)
  - Network and Security Administrators, Network and Security Engineers, Network Defense Analyst, Network Defense Technicians, Network Security Specialist, Network Security Operator, and any security professional handling network security operations
  - Cybersecurity Analyst
  - Entry-level cybersecurity professionals
  - Anyone who wants to become a SOC Analyst.
- Able to escalate incidents to appropriate teams for additional assistance
  - Able to use a Service Desk ticketing system.
  - Able to prepare briefings and reports of analysis methodology and results.
  - Gain knowledge of integrating threat intelligence into SIEM for enhanced incident detection and response
  - Able to make use of varied, disparate, constantly changing threat information.
  - Gain knowledge of Incident Response Process
  - Gain understating of SOC and IRT collaboration for better incident response.

### Course Objectives

- Gain Knowledge of SOC processes, procedures, technologies, and workflows.
- Gain basic understanding and in-depth knowledge of security threats, attacks, vulnerabilities, attacker's behaviors, cyber kill chain, etc.
- Able to recognize attacker tools, tactics, and procedures to identify indicators of compromise (IOCs) that can be utilized during active and future investigations.
- Able to monitor and analyze logs and alerts from a variety of different technologies across multiple platforms (IDS/IPS, end-point protection, servers and workstations).
- Gain knowledge of Centralized Log Management (CLM) process.
- Able to perform Security events and log collection, monitoring, and analysis.
- Gain experience and extensive knowledge of Security Information and Event Management.
- Gain knowledge on administering SIEM solutions (Splunk/AlienVault/OSSIM/ELK).
- Understand the architecture, implementation and fine tuning of SIEM solutions (Splunk/AlienVault/OSSIM/ELK).
- Gain hands-on experience on SIEM use case development process.
- Able to develop threat cases (correlation rules), create reports, etc.
- Learn use cases that are widely used across the SIEM deployment
- Plan, organize, and perform threat monitoring and analysis in the enterprise.
- Able to monitor emerging threat patterns and perform security threat analysis.
- Gain hands-on experience in alert triaging process.
