PowerMax Family – Performance Workshop (PMFPW)

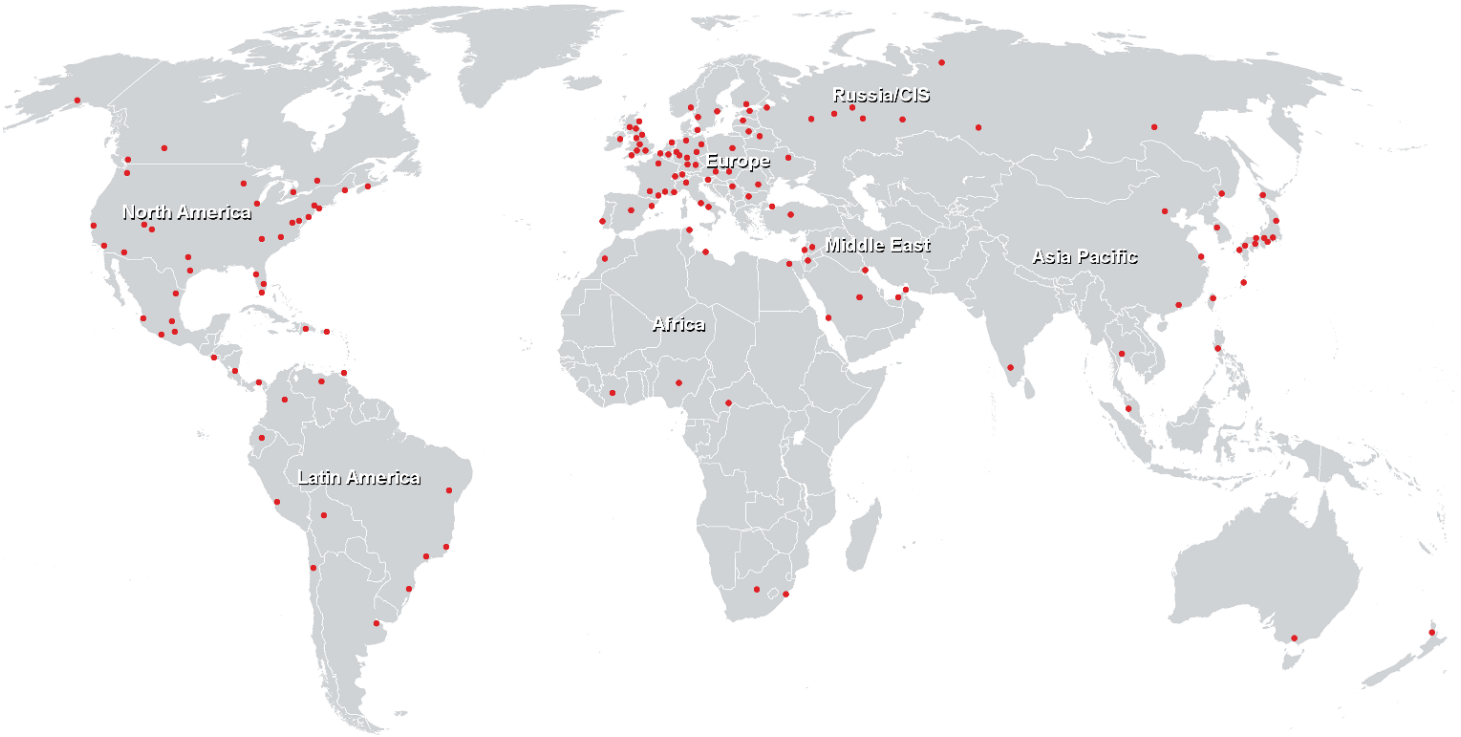

ID PMFPW **Price** on request **Duration** 3 days

Course Content

This course familiarizes participants with the methodology of analyzing the performance of PowerMax arrays using Unisphere for PowerMax. The course also covers the metrics relevant for the analysis of front-end, backend, cache, and SRDF. Learners will be able to identify performance bottlenecks and provide recommendations to troubleshoot issues. Hands-on lab exercises are included to reinforce the concepts and methodology discussed in the lecture.
