

## PowerProtect DD System Administration (PPDDSA)

**ID** PPDDSA **Price** US \$ 4,000.—(excl. VAT) **Duration** 5 days

### Who should attend

This course is available to all audiences. This course is intended for students who plan on using and administering PowerProtect DD systems.

### Prerequisites

To understand the content and successfully complete this course, a student must have a suitable knowledgebase or skill set. The student must understand computer storage, networking, and backup concepts.

### Course Objectives

Upon successful completion of this course, participants will be able to:

- Monitor a PowerProtect DD system
- Configure and manage PowerProtect DD network interfaces
- Access and copy data to PowerProtect DD system
- Customize and manage a PowerProtect DD deduplication file system
- Describe and perform data replication and recovery
- Describe and configure a PowerProtect DD VTL
- Describe and configure DD Boost
- Perform a DD Boost backup
- Describe capacity and throughput planning
- Describe and configure Secure Multi-Tenancy
- Describe and configure Dell EMC Cloud Tier

### Course Content

- PowerProtect DD Basic Administration
- PowerProtect DD Network Interfaces Administration
- PowerProtect DD CIFS and NFS Implementation and Administration
- PowerProtect DD File System and Data Management
- PowerProtect DD Data Replication Implementation and Administration
- DD Boost Implementation and Administration

- PowerProtect DD Virtual Tape Library Implementation and Administration
- Cloud Tier Implementation and Administration
- PowerProtect DD Data Security Implementation
- PowerProtect DD Secure Multi-Tenancy Implementation and Administration
- PowerProtect DD Capacity and Throughput Planning and Monitoring

# PowerProtect DD System Administration (PPDDSA)
