

FortiSandbox Administrator (FORT-ADVTHREATPROT)

ID FORT-ADVTHREATPROT Price on request Duration 2 days

This training is provided by our partner Fortinet.

Who should attend

This course is intended for network security professionals responsible for designing, implementing, and maintaining a Fortinet advanced threat protection solution with FortiSandbox.

This course is part of the following Certifications

Fortinet Certified Professional Security Operations (FCPSO)

Prerequisites

You must have an understanding of the topics covered in FCF - FortiGate Fundamentals (or have equivalent experience).

It is also recommended that you have an understanding of the topics covered in the following courses, or have equivalent experience:

- FortiGate Administrator (FGT-ADM)
- FortiMail Administrator (FORTIMAIL)
- FortiWeb Administrator (FORT-WEB)
- FortiClient EMS Administrator (FORT-CLIENTEMS)

Course Objectives

After completing this course, you should be able to:

- · Identify threat actors and their motivations
- · Identify different types of counterattacks
- Describe Fortinet solutions for different stages of the Cyber Kill Chain
- Analyze the MITRE ATT&CK matrix
- · Identify FortiSandbox architecture and key components
- Plan a FortiSandbox deployment
- Describe FortiSandbox input methods
- Select an appropriate deployment mode and configure initial settings
- Explain FortiSandbox interface requirements
- · Configure alert emails, SNMP monitoring, and a remote

backup

- Analyze dashboards, the operation center, and system events
- Monitor FortiSandbox operation and troubleshoot system issues
- Manage guest VMs
- Configure VM association settings and scan options
