AI Agent Essentials on Google Cloud (AAEGC)

ID AAEGC **Price** CHF 300.—(excl. VAT) **Duration** 3 hours

Who should attend

- **Department Heads:** Need to grow their team's impact without the burnout of increasing headcount. They will learn to oversee digital "Chiefs of Staff" to reclaim their work week and focus on high-level strategy.
- **Change Agents:** Responsible for fixing the clunky, repetitive tasks that slow everyone down. They will learn how to use the Agentic Build Loop to transform "Manual Toil" into smooth, automated workflows.
- **Strategic Architects:** Need to understand how to turn business rules into reliable AI actions. They will gain the skills to design secure "Playbooks" and human safety checks to ensure every agent stays on track and protects the company's data.

Prerequisites

- A basic understanding of Generative AI: Knowing the difference between a simple "one-off" prompt and a continuous conversation with AI.
- Deep knowledge of your own business processes: Being able to clearly describe the step-by-step path a task takes through your department.

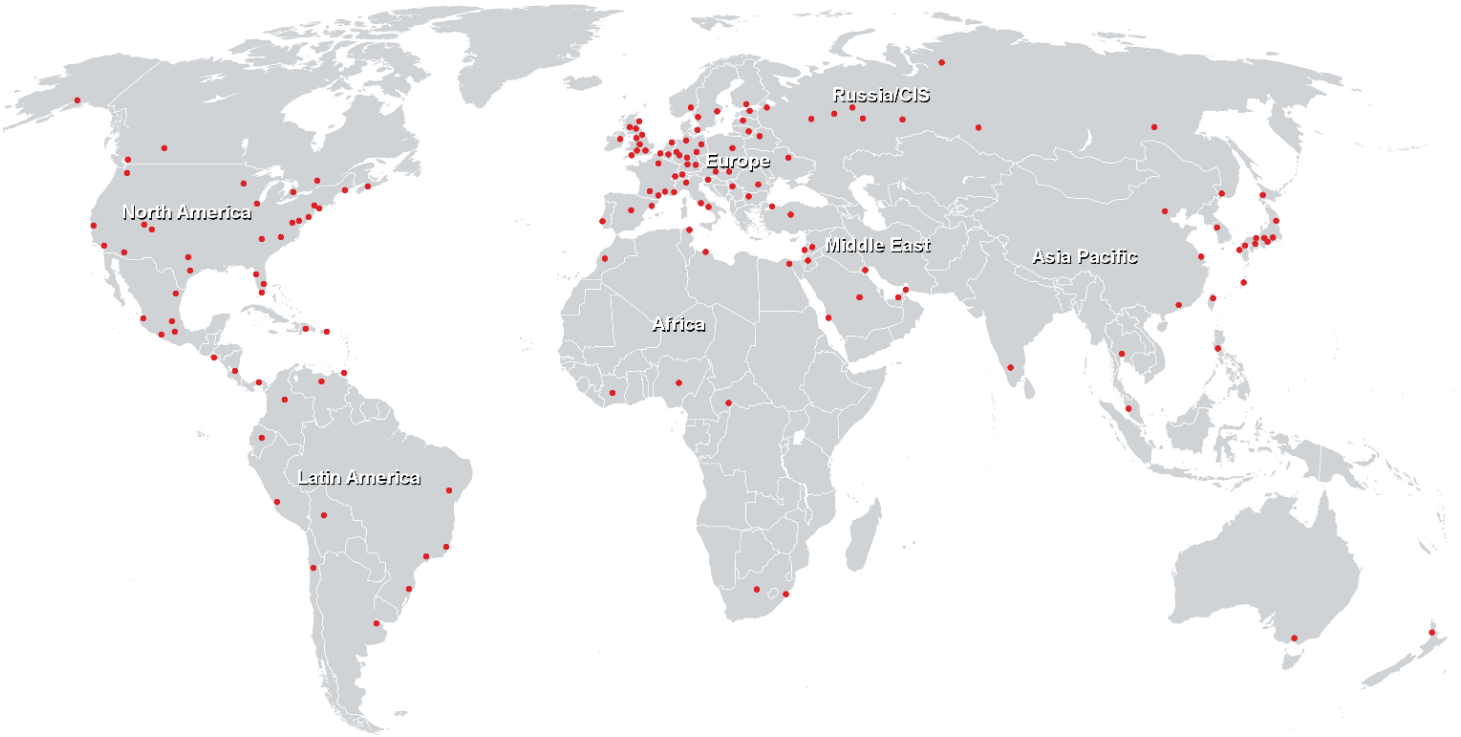

Helpful to be familiar with:

- Identifying "Manual Toil": Spotting the specific, repetitive tasks that act as bottlenecks in your team's daily schedule.
- The "Director" Mindset: A willingness to shift from "doing the work yourself" to "defining the rules" for a digital collaborator.

Course Objectives

- Distinguish between "Librarian" (Stage 2) and "Chief of Staff" (Stage 3) AI agents.
- Direct the construction of functional, grounded agents using the Agentic Build Loop.
- Implement Human-in-the-Loop oversight models to manage business risk.
- Drive responsible agentic transformation and scale departmental capacity.
