Agentic Infrastructure for the Autonomous Enterprise on Google Cloud (AIAEGC)

ID AIAEGC **Price** CHF 300.—(excl. VAT) **Duration** 3 hours

Who should attend

- **Enterprise Architects:** Who need to build a scalable, secure backbone for persistent, Gemini Enterprise-enabled AI workers.
- **Systems Integrators:** Tasked with connecting AI to legacy ERP/CRM data via secure, cross-departmental tool orchestration using the Google Cloud Agent Platform.
- **IT Directors:** Who need to move from "Project Thinking" to "Platform Thinking" to manage a global fleet of autonomous agents while maintaining governance and scalability

Prerequisites

- Completion of Organizing for AI Success.
- Foundational knowledge of Google Cloud (VPC, IAM, Cloud Run).

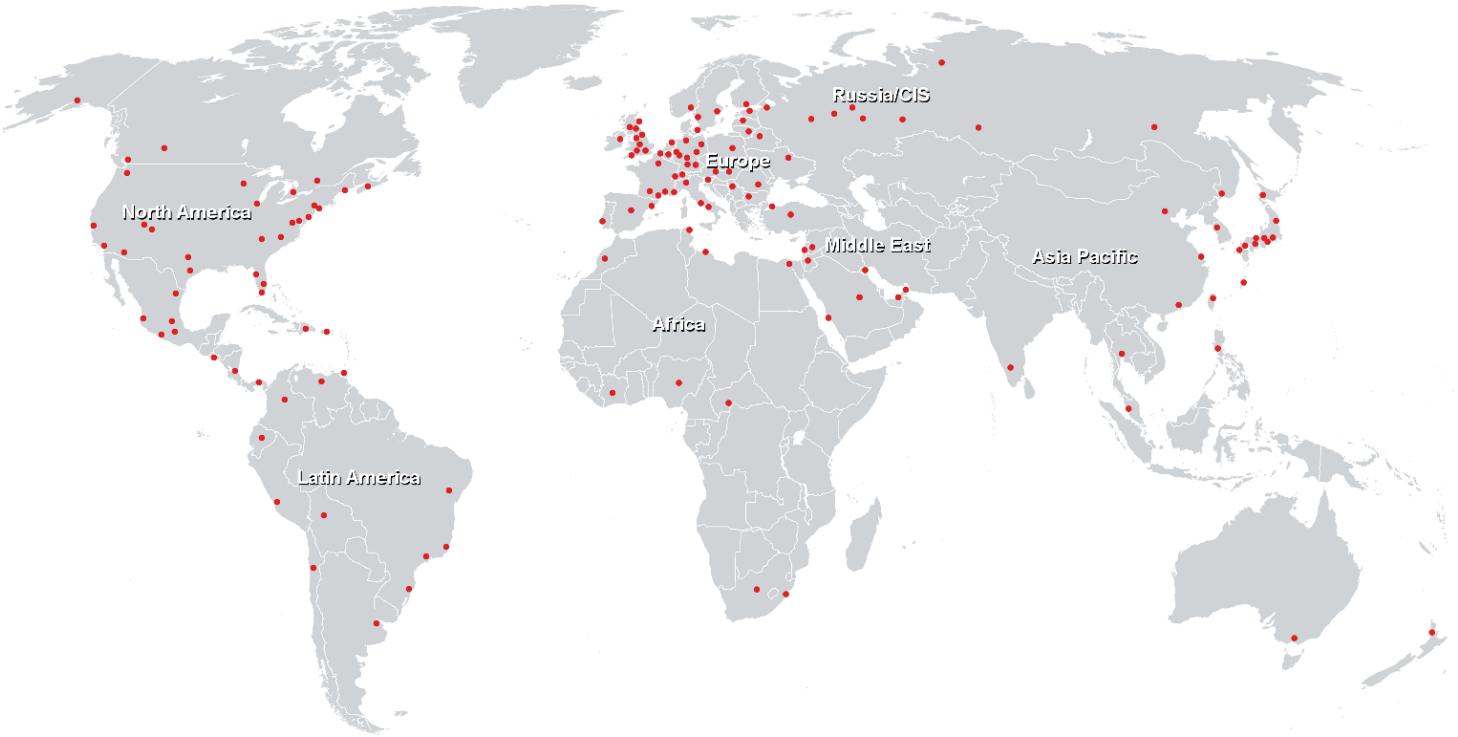

Helpful to be familiar with:

- Python basics
- REST API structures
- RAG concepts

Course Objectives

- Diagnose Agency Gaps: Strip out "Track A" conversational habits and map structural frictions.
- Architect the Engine: Deploy persistent, context-aware reasoning loops inside the Build Tier.
- Secure the Perimeter: Enforce Zero Trust patterns and runtime protections via the Govern Tier.
- Scale the Fleet: Mitigate reasoning drift and measure ROI using the Optimize & Scale Tiers.
