

Building Solutions with Apigee X (BSAX)

ID BSAX **Price** CHF 2,550.—(excl. VAT) **Duration** 3 days

Who should attend

Application developers, API engineers, Solution architects, Security engineers, DevOps engineers. Those who are responsible for the solutioning design, implementation, or management of APIs, API products, or digital products that leverage APIs.

Prerequisites

Completion of the [Managing Google Cloud's Apigee API Platform for Hybrid Cloud \(T-APIHYB-B\)](#) course or equivalent experience with Google Cloud and Apigee.

Course Objectives

- Secure the backend of your legacy application using mutual TLS
- Design applications with an API first design using the OpenAPI specification
- Integrate your API proxy with the Cloud Data Loss Prevention (DLP) API
- Best practices for site reliability with Apigee using monitoring and logging
- Modernize application deployment using Cloud Run and Cloud Build
- Authentication using API Keys and Firebase Authentication with Apigee
- Harden APIs using Apigee Policies and Cloud Armor
- Mitigate external threats with reCAPTCHA Enterprise
- Leverage Apigee Analytics to show custom data capture and reporting
- Leverage Cloud Code in your development environment to locally emulate Apigee
- Use Apigee Integration to improve connectivity with other services in Google Cloud
