

Building Solutions with Apigee X (BSAX)

ID BSAX Price CHF 2,550.—(excl. VAT) Duration 3 days

Who should attend

Application developers, API engineers, Solution architects, Security engineers, DevOps engineers. Those who are responsible for the solutioning design, implementation, or management of APIs , API products, or digital products that leverage APIs.

Prerequisites

Completion of the [Managing Google Cloud's Apigee API Platform for Hybrid Cloud \(T-APIHYB-B\)](#) course or equivalent experience with Google Cloud and Apigee.

Course Objectives

- Secure the backend of your legacy application using mutual TLS
- Design applications with an API first design using the OpenAPI specification
- Integrate your API proxy with the Cloud Data Loss Prevention (DLP) API
- Best practices for site reliability with Apigee using monitoring and logging
- Modernize application deployment using Cloud Run and Cloud Build
- Authentication using API Keys and Firebase Authentication with Apigee
- Harden APIs using Apigee Policies and Cloud Armor
- Mitigate external threats with reCAPTCHA Enterprise
- Leverage Apigee Analytics to show custom data capture and reporting
- Leverage Cloud Code in your development environment to locally emulate Apigee
- Use Apigee Integration to improve connectivity with other services in Google Cloud
