# Modernizing Data Lakes and Data Warehouses with Google Cloud

**ID** MDLDW **Price on request** **Duration** 1 day

## Who should attend

This course is intended for developers who are responsible for querying datasets, visualizing query results, and creating reports.

Specific job roles include:

- Data engineer
- Data analyst
- Database administrators
- Big data architects

## This course is part of the following Certifications

Google Cloud Certified Professional Data Engineer (PDE)

## Prerequisites

Basic proficiency with a common query language such as SQL.

## Course Objectives

- Differentiate between data lakes and data warehouses.
- Explore use-cases for each type of storage and the available data lake and warehouse solutions on Google Cloud.
- Discuss the role of a data engineer and the benefits of a successful data pipeline to business operations.
- Examine why data engineering should be done in a cloud environment.
