Developing APIs with Google Cloud's Apigee API platform (T-APIENG-B)

ID T-APIENG-B **Price** CHF 2,550.—(excl. VAT) **Duration** 3 days

Who should attend

Developers, architects, or engineers responsible for the solutioning, design, implementation, or management of APIs, API products, or digital products that leverage APIs.

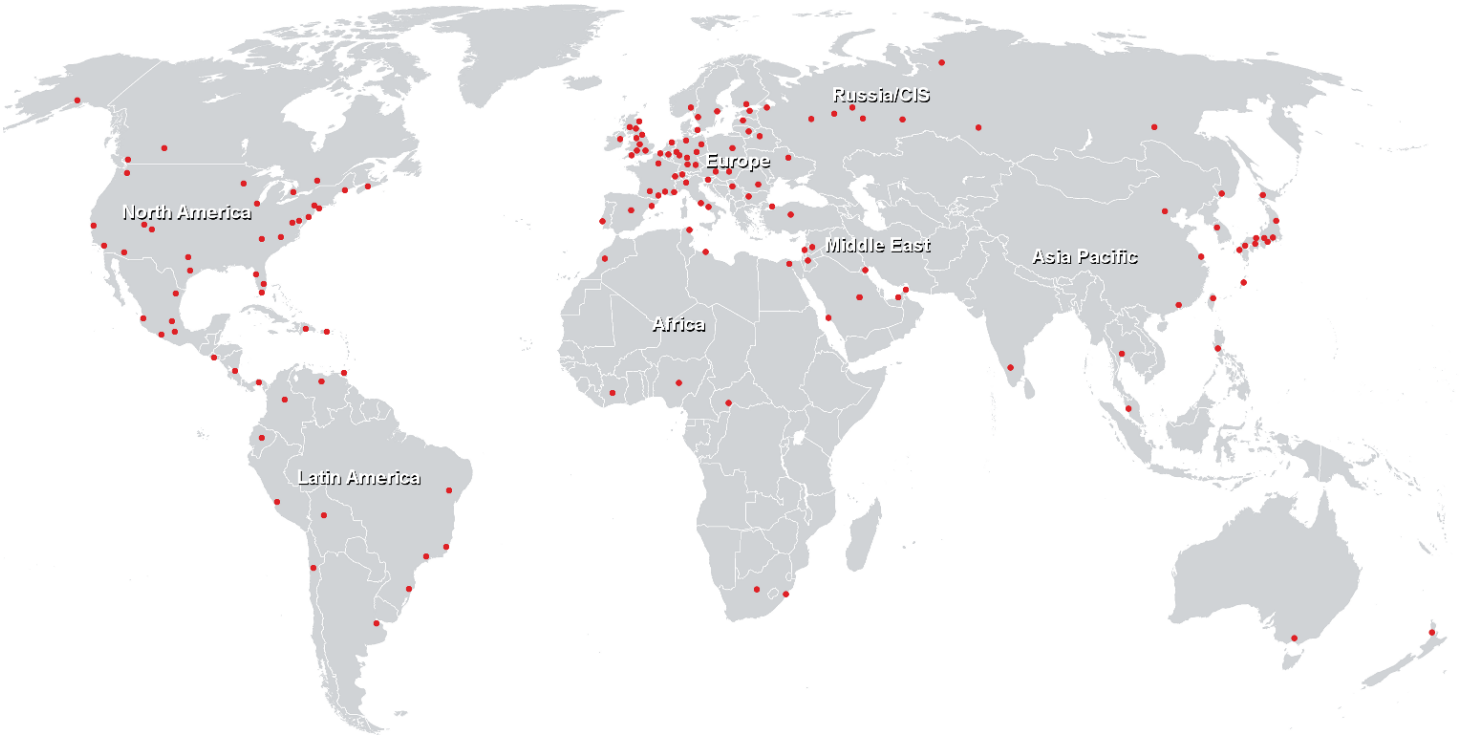

Prerequisites

Familiarity with HTTP, XML, JSON, and JavaScript.

Course Objectives

- Describe the features of Apigee that are used to create and manage APIs throughout the API lifecycle.
- Describe the fundamentals of REST API design.
- Discuss API products and API product strategies.
- Describe the use cases and flows for the OAuth 2 grant types
- Discuss the Apigee platform capabilities for implementing mediation, traffic management, caching, and fault management.
- Describe how Apigee integrates with and enhances the use of large language models in AI-based APIs and apps.
- Describe advanced Apigee features that can help with API management, security, and discovery.
- Build APIs with the Apigee API platform.
