

Developing APIs with Google Cloud's Apigee API platform (T-APIENG-B)

ID T-APIENG-B **Price** CHF 2,550.—(excl. VAT) **Duration** 3 days

Who should attend

Developers, architects, or engineers responsible for the solutioning, design, implementation, or management of APIs, API products, or digital products that leverage APIs.

Prerequisites

Familiarity with HTTP, XML, JSON, and JavaScript.

Course Objectives

- Explore and put into practice API design, development and management concepts.
- Describe the fundamentals of REST API design.
- Describe API products, API product strategies, and how to publish APIs to a developer portal.
- Describe Apigee terminology and organizational model based on Apigee product capabilities.
- Discuss the role of user authentication and authorization and the importance of API security.
- Identify capabilities available to secure, scale, and manage APIs and API products.
- Explore and put into practice API design, development and management concepts.
- Discuss the out-of-the-box platform capabilities for implementing mediation, traffic management, caching, and fault handling.
- Describe the value and use of API analytics.
- Describe the deployment options for the Apigee platform.
- Interact with the Apigee API Platform.
