

# HPE Intelligent Management Center - Managing and Monitoring your Network (HQ7C1S)

ID HQ7C1S Price on request Duration 3 days

## Who should attend

This course is intended for network or systems administrators, network engineers, and consultants who plan to deploy, manage, monitor, and configure HPE Intelligent Management Center

## Prerequisites

Learners should have some networking experience to get the most from this training course. They should:

- Understand networking, along with IPv4 addressing
- Have some knowledge of the CLI commands on HPE Aruba Switches (AOS and CX), Comware v7 and Cisco (this knowledge is beneficial, but not required)
- Understand file architecture on Comware and Aruba, including Telnet/SSH, and start up and saved configurations
- Understand SNMP configuration
- Understand traps and how they are configured on the switches

## Course Objectives

By the end of the course, you should be able to:

- Understand the HPE Intelligent Management Center installation process and how to initially access HPE Intelligent Management Center
- Understand how to add devices into HPE Intelligent Management Center using auto discovery
- Understand the different views in HPE Intelligent Management Center and how they can be utilized
- Understand the Configuration Centre and how it can be used for configuration management
- Understand how alarms and traps are generated in HPE Intelligent Management Center
- Understand how HPE Intelligent Management Center can be used to manage, monitor and configure VLANs.
- Understand how HPE Intelligent Management Center can be used for performance management

- Understand how HPE Intelligent Management Center can be used for virtualization resource management
- Understand how to troubleshoot HPE Intelligent Management Center

## Course Content

- Module 1: HPE Intelligent Management Center Introduction
- Module 2: Installation and Initial Access
- Module 3: Adding Devices
- Module 4: Trap Management
- Module 5: View Management
- Module 6: Configuration Management
- Module 7: Alarms and Events
- Module 8: VLAN Management
- Module 9: Performance Management
- Module 10: Virtualization Management
- Module 11: Troubleshooting HPE Intelligent Management Center
