

## Artificial Intelligence Foundation (HQ7H8S)

ID HQ7H8S Price on request Duration 3 days

### Who should attend

The EXIN BCS Artificial Intelligence Foundation certification is focused on individuals with an interest in (or need to implement) AI in an organization— especially those working in areas such as science, engineering, knowledge engineering, finance, education or IT services.

### Course Objectives

In this course, students will learn to:

- Describe how artificial intelligence (AI) is part of 'Universal Design' and 'The Fourth Industrial Revolution'
- Demonstrate understanding of the artificial intelligence (AI) intelligent agent description
- Explain the benefits of artificial intelligence (AI)
- Describe how we learn from data—functionality, software and hardware
- Demonstrate an understanding that artificial intelligence (AI) (in particular, machine learning—ML) will drive humans and machines to work together
- Describe a 'learning from experience' Agile approach to projects

- Building a Machine Learning Toolbox – Two Case Studies
- Building a Machine Learning Toolbox
- Building a Machine Learning Toolbox
- Building a Machine Learning Toolbox
- A Simple Neural Network Schematic
- Exercise Five
- Machine Learning and Consciousness
- The Future of Artificial Intelligence
- Exercise Six
- Learning from Experience
- Conclusion
- Exam Practice and Preparation
- Examination

### Course Content

- Introduction and Course Outline
- Human and Artificial Intelligence—Part 1
- Exercise 1
- Human and Artificial Intelligence—Part 2
- Ethics and Sustainability – Trustworthy AI—Part 1
- Ethics and Sustainability – Trustworthy AI—Part 2
- Sustainability, Universal Design, Fourth Industrial Revolution and Machine Learning
- Exercise Two
- Being Human, Conscious, Competent and Adaptable
- Exercise Three
- Applying the Benefits of AI
- Applying the Benefits of AI
- Building a Machine Learning Toolbox
- Building a Machine Learning Toolbox
- Exercise Four
