Configure IBM Case Manager Security (V5.3.2) (F2920G)

ID F2920G **Price** CHF 990.—(excl. VAT) **Duration** 1 days

Who should attend

This course is for system administrators who maintain IBM Case Manager environments and for solution architects who must plan security requirements for their solutions.

Prerequisites

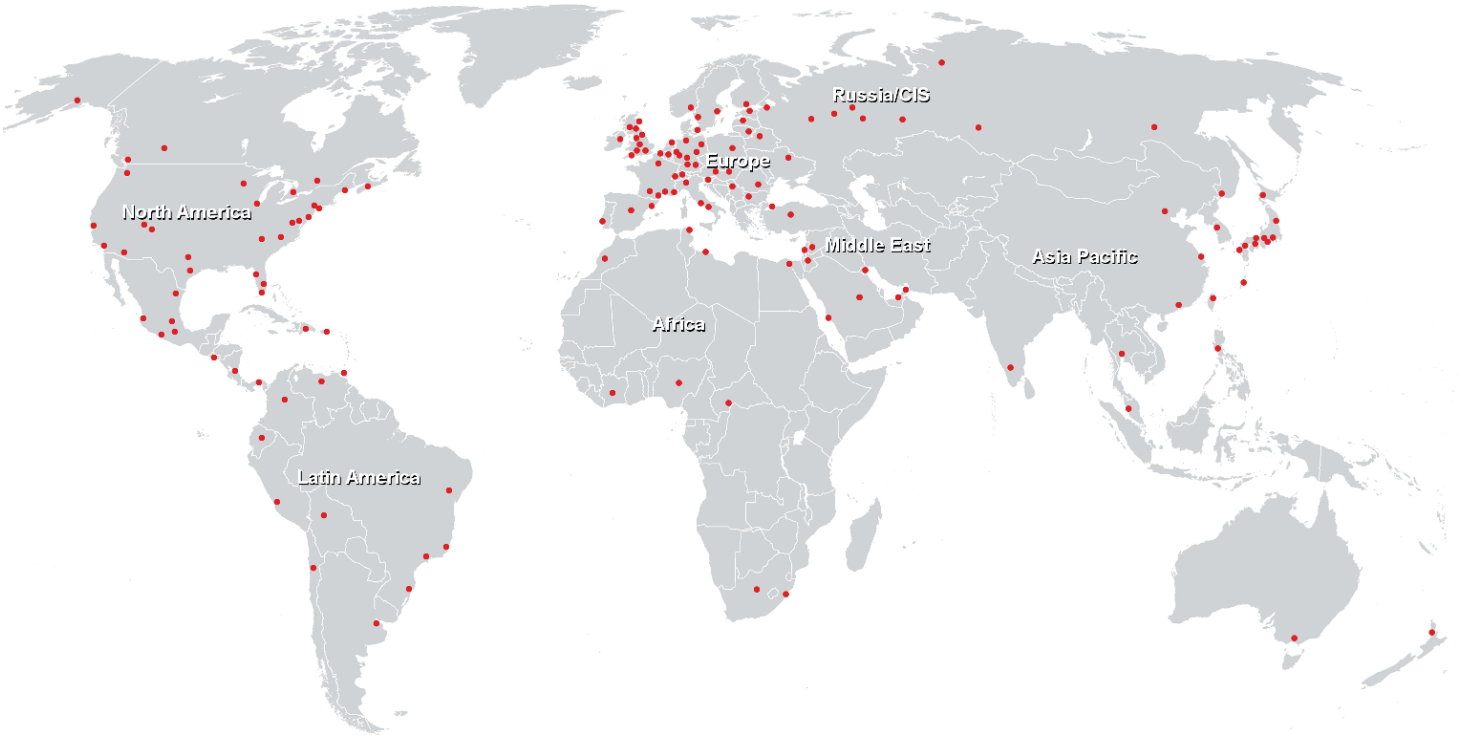

• Knowledge of Case Manager concepts, such as case management, case, solution, task. • Ability to build, validate, deploy, and test solutions. • or Build an IBM Case Manager Solution V5.3.2 (classroom)(F2910G) • or Build an IBM Case Manager SolutionV5.3.2 (self-paced)(F2919G)

Course Content

In this course you will configure security for IBM Case Manager environments and solutions. You will work with project areas, control access to cases, and create security configurations. You will deploy a solution in a new environment and use a security configuration package file to manage solution security. You will customize security settings with a custom privilege definition and use security proxies to automate security changes.

Configure IBM Case Manager Security (V5.3.2) (F2920G)
