

Power Systems Running Linux: Server Administration (LX071G)

ID LX071G **Price** CHF 2,400.—(excl. VAT) **Duration** 3 days

Who should attend

System administrators that have experience with either Linux or Power Systems, but not both. This course provides the bridge for those skill sets to be brought together.

Prerequisites

Students attending this course should have a basic background in systems administration and/or troubleshooting. No previous course work is required.

Course Content

This course introduces basic administrative tasks associated with Linux Servers hosted on Power Systems servers. This includes installation, command line operations, system administration, device management, IBM tools, and system recovery.
