

Managing and Deploying APIs with IBM API Connect (WD502G)

ID WD502G **Price** CHF 1,980.—(excl. VAT) **Duration** 2 days

Who should attend

This course is designed for API Connect cloud administrators, lifecycle administrators, and application developers.

explains how to analyze the API event record and statistics.

For information about other related courses, see the IBM Training website:

Prerequisites

Conceptual knowledge of the API Economy; for more information, see the resources at <https://developer.ibm.com/apiconnect/>

<http://www.ibm.com/training>

Course Objectives

This course teaches you how to manage, monitor, and subscribe APIs with IBM API Connect V5. You learn how to manage and monitor the API Connect infrastructure through the Cloud Manager server. You learn how the API Manager server manages and enforces the API lifecycle. You also learn how to manage provider organizations and developer organizations, and how to customize the layout and design of the Developer Portal. Finally, the course explains how to analyze the API event record and statistics.

For information about other related courses, see the IBM Training website:
