Attack Prevention with Juniper Networks Firewalls (APJF)

ID APJF **Price** US $ 800.—(excl. VAT) **Duration** 1 days

Who should attend

This course is intended for network engineers, support personnel, reseller support, and others responsible for implementing Juniper Networks products.

Course Objectives

After successfully completing this course, you should be able to:

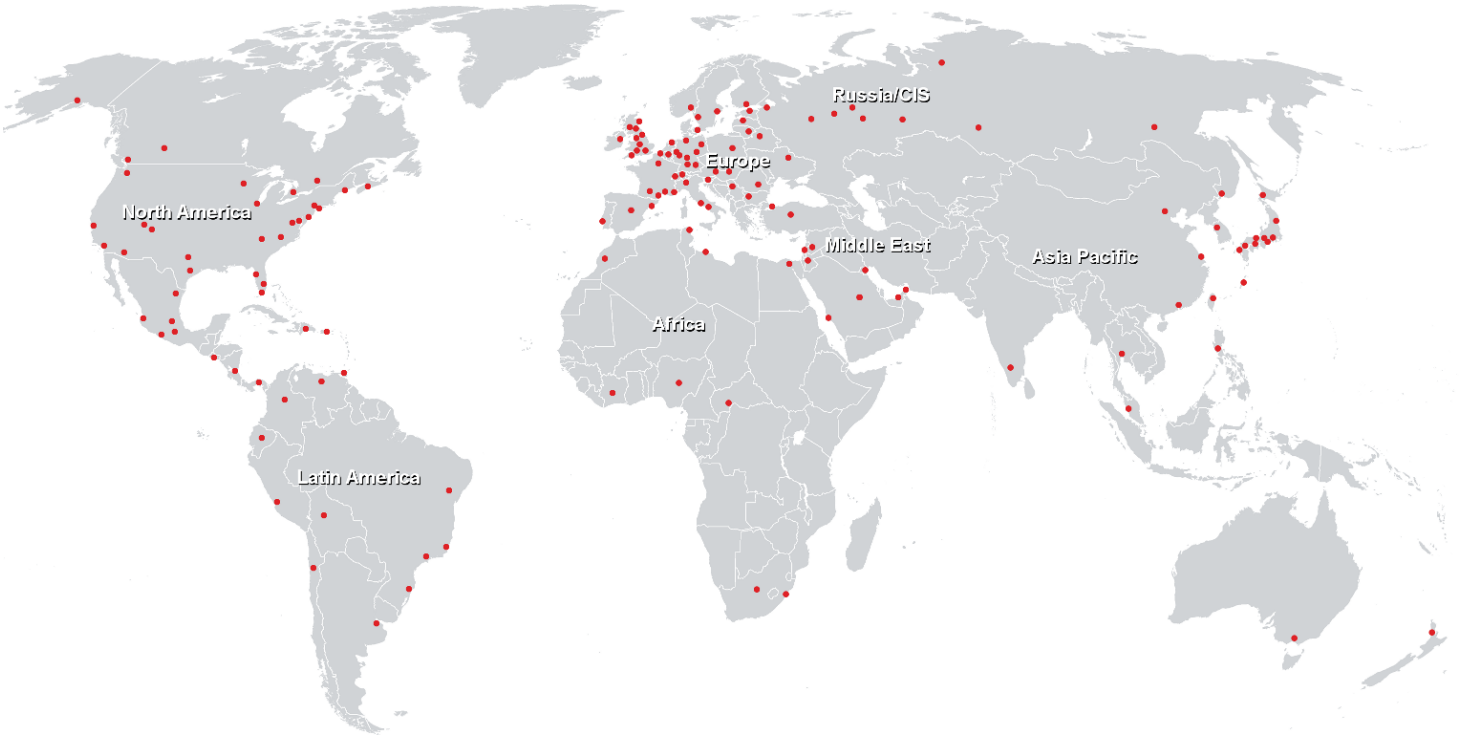

- Configure attack prevention features, including:
  - SCREEN options
  - Deep inspection (DI); and
  - Antivirus (AV) scanning.
- Configure URL filtering.
- Configure antispam filters.

Course Content

This one-day course meets the business needs of customers who are deploying the attack prevention features of ScreenOS software. The course focuses specifically on the attack-related features and assumes familiarity with ScreenOS software. Upon completing this course, you should be able to return to work and successfully configure and verify the desired attack prevention features. This course has been updated to Revision 6.c.
