

## Master Class: Data Analysis with Python (PYTHON05)

ID PYTHON05 Price CHF 2,550.—(excl. VAT) Duration 3 days

#### Who should attend

Data analysts, business analysts, data engineers, BI specialists, database specialists, Excel analysts

### **Prerequisites**

Course <u>Master Class: Advanced Python (Associate Training)</u> (<u>PYTHON03</u>) or equivalent knowledge

#### **Course Objectives**

- · Data preparation
- · Data transformation
- Quality evaluations
- Analysis
- Data analysis applications
- · Introduction to Machine Learning and AI

#### **Course Content**

- Basics of Numpy
  - o What this package can do
  - · Which data analyses are possible
- Introduction to pandas
  - Pandas Data Structures
  - Functionality
  - Which data analyses are possible and useful with pandas
- Loading and saving data
  - o Practical handling of the most important file formats
  - · Efficiency, performance and reliability
- Prepare and clean up data
  - $\circ\,$  Dealing with missing data
  - Data transformation
- · Linking, combining and transforming data
- Visualization
- · Aggregation and grouping of data
- Time series
- Pandas for advanced learners
- · Modelling Libraries
- Examples from data analysis
- · Overview learning models with scikit
