Master Class: Transact SQL – SQL Extensions for SQL Server and Azure SQL (TSQL)

ID TSQL **Price** CHF 1,940.—(excl. VAT) **Duration** 2 days

Prerequisites

Good knowledge of standard SQL (such as SQL Standard Intensive Training (SQL02))
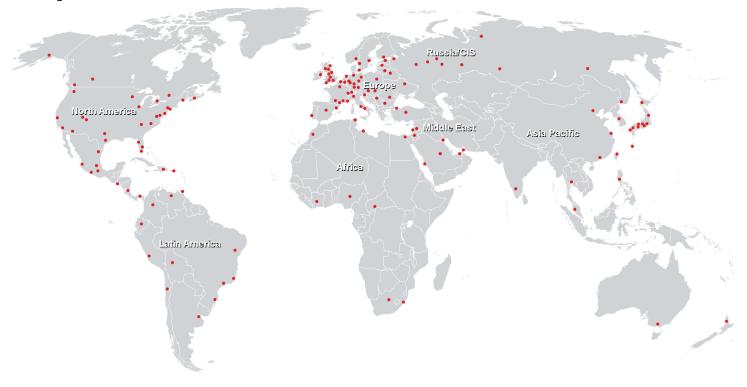

Course Objectives

You can use the very productive T-SQL extensions. Develop stored procedures and functions and use them successfully locally and/or in the cloud.

Course Content

- Presentation of the most important functions and components of SQL Server and Azure SQL.
- Repetition Select
- SQL Server data types
- More complex DML instructions
- Write queries that use built-in functions.
- Aggregate data.
- Write subqueries.
- Create and implement views and table valued functions.
- Use set operators to combine query results.
- Writing queries that enable windowing of the data.
- Transform data by using pivot, unpivot, rollup and cube.
- programming constructs such as variables, conditions and loops to T-SQL code.
- Stored Procedures entwickeln
- Integrate Python code
