Designing and Implementing Cloud-Native Applications Using Microsoft Azure Cosmos DB (DP-420T00)

ID DP-420T00   **Price** CHF 3,370.—(excl. VAT)   **Duration** 4 days

Who should attend

Software engineers tasked with authoring cloud-native solutions that leverage Azure Cosmos DB SQL API and its various SDKs. They are familiar with C#, Python, Java, or JavaScript. They also have experience writing code that interacts with a SQL or NoSQL database platform.

This course is part of the following Certifications

Microsoft Certified: Azure Cosmos DB Developer Specialty (MCACDB)

Prerequisites

Before attending this course, students must have:

- Knowledge of Microsoft Azure and ability to navigate the Azure portal (AZ-900 equivalent)
- Experience writing in an Azure-supported language at the intermediate level. (C#, JavaScript, Python, or Java)
- Ability to write code to connect and perform operations on a SQL or NoSQL database product. (SQL Server, Oracle, MongoDB, Cassandra or similar)

Course Objectives

- Create and configure Azure Cosmos DB SQL API account, database, and container
- Use the .NET SDK to manage resources and perform operations
- Perform queries of varying complexity
- Design a data modeling and partitioning strategy
- Optimize queries and indexes based on characteristics of an application
- Use the Azure Resource Manager to manage accounts and resources with CLI or JSON and Bicep templates

Course Content

- Get started with Azure Cosmos DB SQL API

- Plan and implement Azure Cosmos DB SQL API
- Connect to Azure Cosmos DB SQL API with the SDK
- Access and manage data with the Azure Cosmos DB SQL API SDKs
- Execute queries in Azure Cosmos DB SQL API
- Define and implement an indexing strategy for Azure Cosmos DB SQL API
- Integrate Azure Cosmos DB SQL API with Azure services
- Implement a data modeling and partitioning strategy for Azure Cosmos DB SQL API
- Design and implement a replication strategy for Azure Cosmos DB SQL API
- Optimize query performance in Azure Cosmos DB SQL API
- Administrating and Monitoring tasks for an Azure Cosmos DB SQL API solution
- Manage an Azure Cosmos DB SQL API solution using DevOps practices
- Create server-side programming constructs in Azure Cosmos DB SQL API
