E-Series SANtricity Administration (ESADM)

ID ESADM **Price** CHF 1,980.—(excl. VAT) **Duration** 2 days

Who should attend

Solutions engineer (SE), architect, support engineer, implementation engineer, and professional services

Prerequisites

E-Series Fundamentals

Course Objectives

Explore how to deploy, configure, and monitor NetApp® E-Series and EF-Series storage systems. In the deployment phase, you use NetApp SANtricity® Storage Manager and SANtricity System Manager to create the configuration, perform administration tasks, and examine data protection features. During post-deployment, you use SANtricity Unified Manager and System Manager to collect storage system information for trend analysis, troubleshooting, performance monitoring, and tuning.

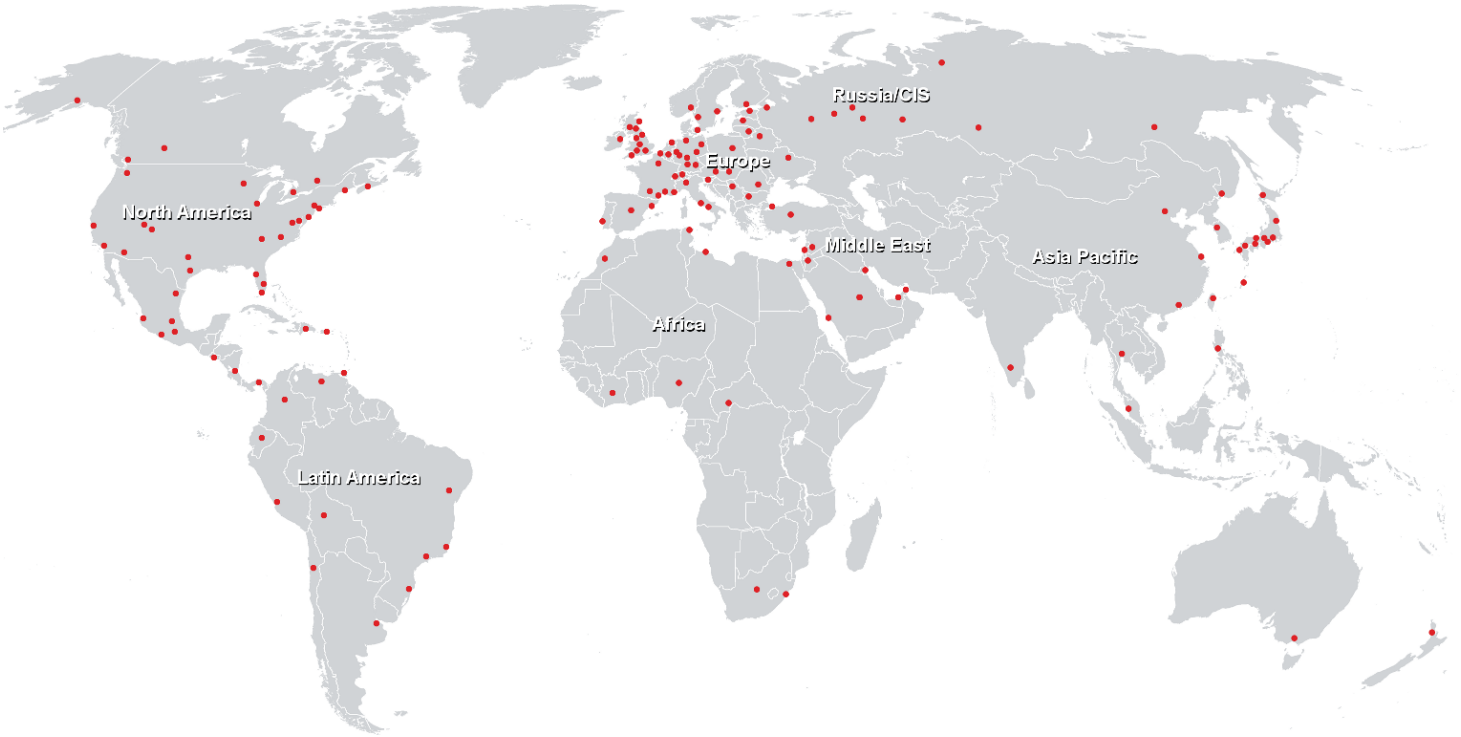

This course focuses on enabling you to do the following:

- Explore the features of NetApp E-Series and EF-Series storage systems
- Identify and use administrative and support tools
- Describe and implement configuration concepts
- Perform routine volume administration tasks
- Perform volume group and disk pool administration tasks
- Identify and perform general system administration tasks
- Collect and monitor pertinent storage system information
- Implement data protection features

Course Content

- Module 1: Introduction to ESeries and EF-Series storage Systems
- Module 2: Configuration concepts and initial Setup
- Module 3: Disk pool Administration
- Module 4: Volume Group Administration
- Module 5: SSD Cache Administration
- Module 6: General administration Tasks
- Module 7: Data collection and Monitoring
