

Data Parallelism: How to Train Deep Learning Models on Multiple GPUs (DPHTDLM)

ID DPHTDLM Price on request Duration 1 day

Prerequisites

Experience with deep learning training using Python

Course Objectives

By participating in this workshop, you'll:

- Understand how data parallel deep learning training is performed using multiple GPUs
- Achieve maximum throughput when training, for the best use of multiple GPUs
- Distribute training to multiple GPUs using Pytorch Distributed Data Parallel
- Understand and utilize algorithmic considerations specific to multi-GPU training performance and accuracy

Data Parallelism: How to Train Deep Learning Models on Multiple GPUs (DPHTDLM)
