## Application Lifecycle Management (ALM/QC) Essentials (1-5660)

**ID 1-5660**   **Price on request**   **Duration 3 days**

### Course Objectives

On completion of this course, you should be able to:

- Define ALM.
- Create releases and cycles and construct requirements.
- Analyze risks associated with requirements.
- Organize subjects and tests in a Test Plan tree.
- Design and create test plans.
- Generate test scripts from design steps.
- Create Test Sets.
- Execute manual tests.
- Record and track test execution results.
- Log and manage defects.
- Use version control to keep track of changes.
- Import and export from Microsoft Excel.
- Generate reports and graphs using the dashboard.

### Course Content

- Explain ALM as a software delivery platform.
- Explore the modules of the ALM platform.
- Create releases, cycles, requirements, and milestones.
- Plan and organize release activities.
- Create a test plan.
- Create and execute tests to validate features and ensure quality.
- Create and log defects.
- Utilize graphs and dashboard views to monitor project status and progress.
