OpenText™ ScanCentral Dynamic Application Security Testing Essentials (2-7740)

ID 2-7740 **Price** on request **Duration** 3 days

Prerequisites

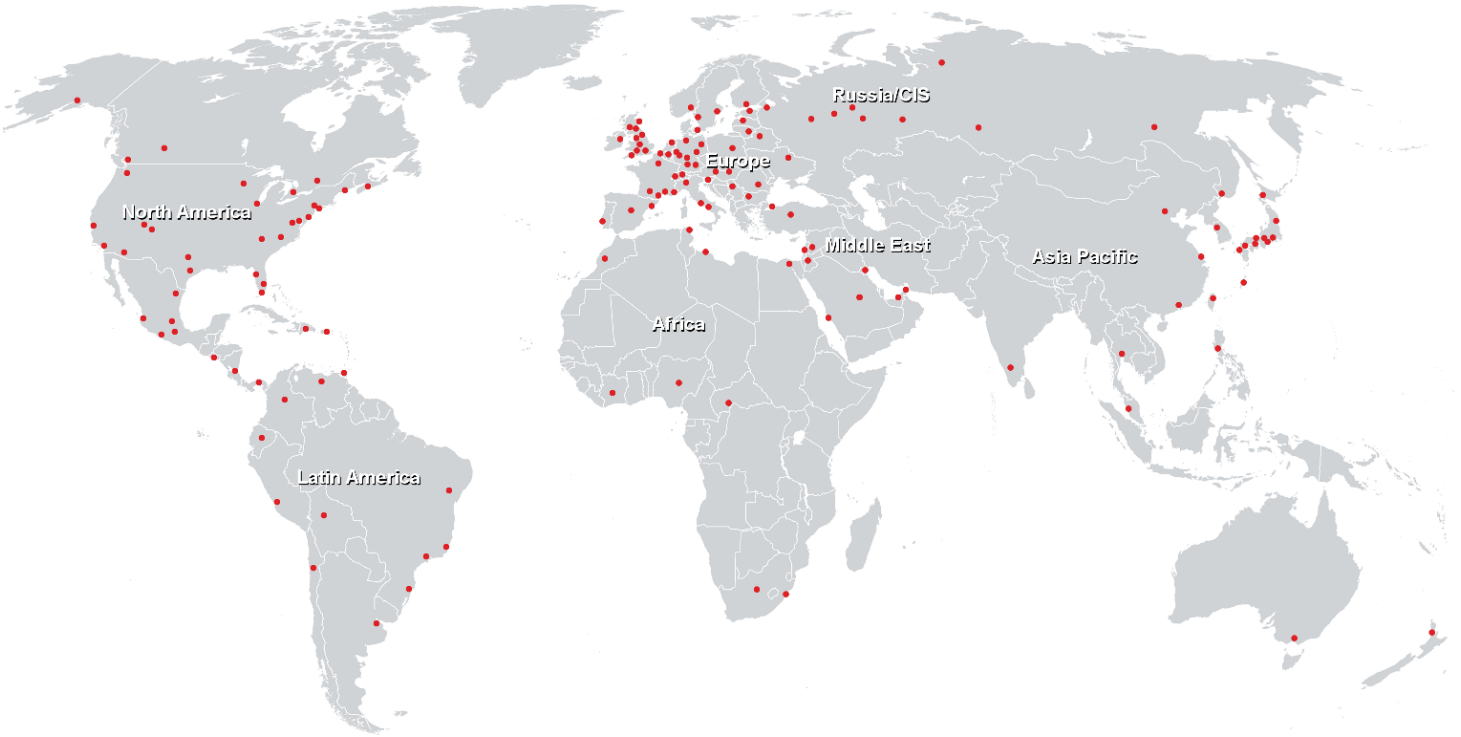

To be successful in this course, you should have familiarity working with OpenText ScanCentral DAST through the OpenText Software Security Center for a minimum of one month or longer. You need to have basic programming skills, the ability to read Java or .NET, identify Command-Line usage, and web technologies, such as HTTP requests and responses, HTML tags, JavaScript, and server-side dynamic content (JSP, ASP, or similar); plus, having computer desktop, browser, and file system navigation skills.

Course Objectives

On completion of this course, participants should be able to:

- Use OpenText ScanCentral DAST to run scans on applications effectively.
- Verify and review the OpenText ScanCentral DAST results in the OpenText Software Security Center application.
- Create comprehensive standards, workflow-driven, REST API, and Jenkins DevOps macros, scans, and reports.
