

# ArcSight-Platform-Installing and Configuring ArcSight Platform (ARC4300I)

**ID** ARC4300I **Price** on request **Duration** 5 days

## Who should attend

This course is designed for Security Professionals and SOC Administrators, who are responsible for deploying and administrating the ArcSight Platform within their environment.

## Prerequisites

To be successful in this course, you should have the following prerequisites or knowledge:

- ESM200 - ESM Administrator and Analyst or comparable ArcSight experience
- Experience working with command line tools
- Experience deploying applications in Windows and Linux environments
- Computer desktop, browser, and file system navigation skills
- Two Monitors to make it easy to review the guides on one screen, and the lab on the second screen

- System Requirements
- YAML Files
- Installing ArcSight Platform
- Post-Install Activities
- Transformation Hub Management from Fusion ArcMC
- Producing Events and Transformation Hub Ingestion
- Collectors and CTH Deployment from ArcMC
- Topic and Route Management
- Integrating ESM and SOAR
- Enabling Single Sign-On
- Managing Users in ArcSight
- Adding More ArcSight Capabilities

## Course Objectives

On completion of this course, participants should be able to:

- Describe the ArcSight Platform and its Architecture
- Describe the system requirements
- Install ArcSight Platform
- Verify a successful installation
- Configure ArcSight Platform to ingest events
- Configure collectors and CTH with ArcMC
- Configure Topics and Routes
- Configure ESM and SOAR Integration
- Manage ArcSight Users
- Enable Single Sign-On
- Add features to an existing ArcSight installation

## Course Content

- Architecture
