

Red Hat JBoss Application Administration I (AD248)

ID AD248 **Price** CHF 2,970.—(excl. VAT) **Duration** 5 days

Who should attend

System administrators who are either new to Red Hat JBoss or have experience with Red Hat JBoss Enterprise Application Platform 7.

This course is part of the following Certifications

Red Hat Certified JBoss Administrator (RHCJA)

Prerequisites

- Take our free assessment to gauge whether this offering is the best fit for your skills
- Base experience with system administration on Microsoft Windows, UNIX, or Linux® operating systems
- Basic understanding of TCP/IP networking
- No prior knowledge of Java or shell scripting is required

Course Objectives

Impact on the organization

This course is intended to develop the skills needed to minimize time to market for applications, and to simplify administration tasks. These skills are suitable for organizations seeking to increase application stability and cut costs for managing applications.

Red Hat has created this course in a way intended to benefit our customers, but each company and infrastructure is unique, and actual results or benefits may vary.

Impact of this training

As a result of attending this course, you should be able to manage JBoss EAP 7 in both standalone and domain mode with both the EAP CLI and web console.

Course Content

- Installing and run JBoss EAP 7 in standalone mode and domain mode

- Configuring and managing a JBoss EAP domain
- Deploying applications to JBoss EAP 7 in standalone and domain mode
- Configuring the datasource subsystem
- Configuring Java™ Message Service (JMS)
- Configuring the logging subsystem
- Configuring the web subsystem
- Implementing application security in JBoss EAP 7
- JVM configuration and tuning for JBoss EAP
- Clustering JBoss EAP instances
