

Red Hat Single Sign-On Administration (DO313)

ID DO313 **Price** 1,800.— €(excl. VAT) **Duration** 2 days

Who should attend

System Administrators responsible for administering Red Hat Single Sign-On servers.

- Configuring Identity Brokering and user identity federation from external systems
- Configuring password policies

Prerequisites

- [Red Hat JBoss Application Administration I \(AD248\)](#) is recommended but not required
- Experience with writing web based applications using Node.js, HTML5, Quarkus, or Java EE/Jakarta EE is recommended but not required.

Course Objectives

Impact on the organization

This course is intended to develop the skills needed to configure authentication and authorization for applications using single sign-on standards like OIDC and OAuth, resulting in improved security and simplified authentication and authorization.

Impact of the individual

As a result of attending this course, students will understand how to use Red Hat Single Sign-On to configure, manage, and troubleshoot authentication and authorization security policies for business-critical applications.

Students will learn how to install, configure and manage an instance of Red Hat Single Sign-On on bare metal, virtual machines and OpenShift, and configure authentication and authorization security policies for applications.

Course Content

- Installing Red Hat Single Sign-On on virtual machines and on OpenShift Container Platform
- Authenticating and authorizing applications using OAuth and OIDC
