Integrating with the Salesforce Platform in Lightning Experience (DEX502)

ID DEX502   **Price** on request   **Duration** 5 days

Who should attend

Integrating with the Salesforce Platform is ideal for customer developers, system integrators, architects, and independent software vendors (ISVs) new to the platform who want to learn how to design and build integrations with the Salesforce platform cloud applications.
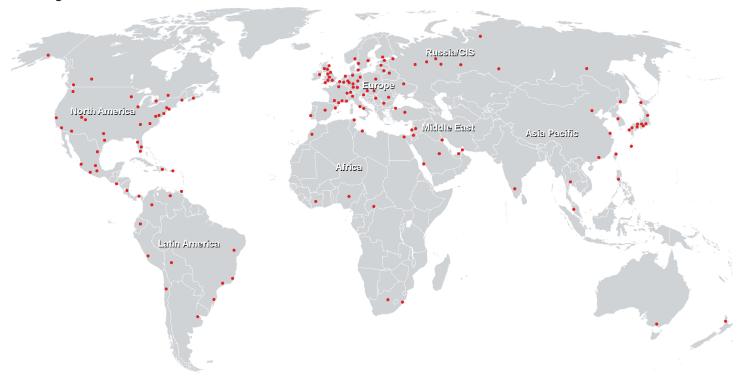

Prerequisites

It is not necessary to be a Salesforce platform developer to take this course; however, we recommend that participants be familiar with the Salesforce platform and proficient in an object-oriented programming language such as Java or C#. Familiarity with JavaScript frameworks, such as Node.js, is also recommended, but not required.

Course Objectives

- Identify various integration techniques.
- Develop methods for integrating with Salesforce platform.
- Identify the advantages of various integration techniques.
- Integrate with Salesforce platform web services.
- Build custom web services.
- Integrate with the Streaming and Bulk APIs.
- Use Salesforce Connect and Heroku Connect to implement declarative integrations.
- Implement single sign-on, social sign-on, and social customer service.
- Embed external applications into the Salesforce user interface using Canvas.
