

SAFe® for Hardware (HW)

ID HW Price on request Duration 2 days

Who should attend

- System Engineers
- Engineering Practitioners and Developers
- Project and Product Managers
- Team Leads and Managers
- Quality and Compliance Professionals

Course Objectives

What You Will Learn:

- How to design for change, think in smaller batches, and establish faster feedback loops.
- Approaches for gathering and responding to rapid technical, market, and user feedback to iterate and refine products and processes in real-time.
- Best practices for strengthening teamwork and integration between engineers and stakeholders for more effective workflows.
- Proactive risk management, detecting and mitigating safety issues earlier, and integrating compliance into development without impacting velocity.
- Tips for aligning suppliers with Agile workflows and mindsets to ensure more effective coordination and delivery.
- Improve cross-functional collaboration planning, forecasting, delivery, and measurement.
