IREB Foundation (CPRE) (IRF)

ID IRF **Price** 1,290.— €(excl. VAT) **Duration** 3 days

Who should attend

You might be a service or IT organisation manager or employee, project manager, CEO, IT professional or business manager.

Prerequisites

You need no previous knowledge to participate in the IREB Foundation (CPRE) training. All necessary contents are communicated during the training.

Course Objectives

Over the course of 3 days, you'll learn the basics of eliciting, analysing, specifying, documenting, reviewing and administering requirements. This means that you'll be able to correctly record the wishes of the customer and minimise the risk of delivering software, services or projects with no added value to the customer.

Within the training, you'll take the official exam to become an "IREB® Certified Professional for Requirements Engineering – Foundation Level".

After the training you will want to have obtained new skills and knowledge.

The IREB Foundation training enables you the following:

- You'll be able to use elementary requirements engineering in practice.
- You'll know the pitfalls of human communication and be able to take them into account in your work as a requirement engineer.
- You'll have gained an overview of different documentation methods and be able to handle ideally in your undertakings.
- You'll know the main aspects of professional requirement administration.
- You'll be a certified IREB® Certified Professional for Requirements Engineering – Foundation Level.

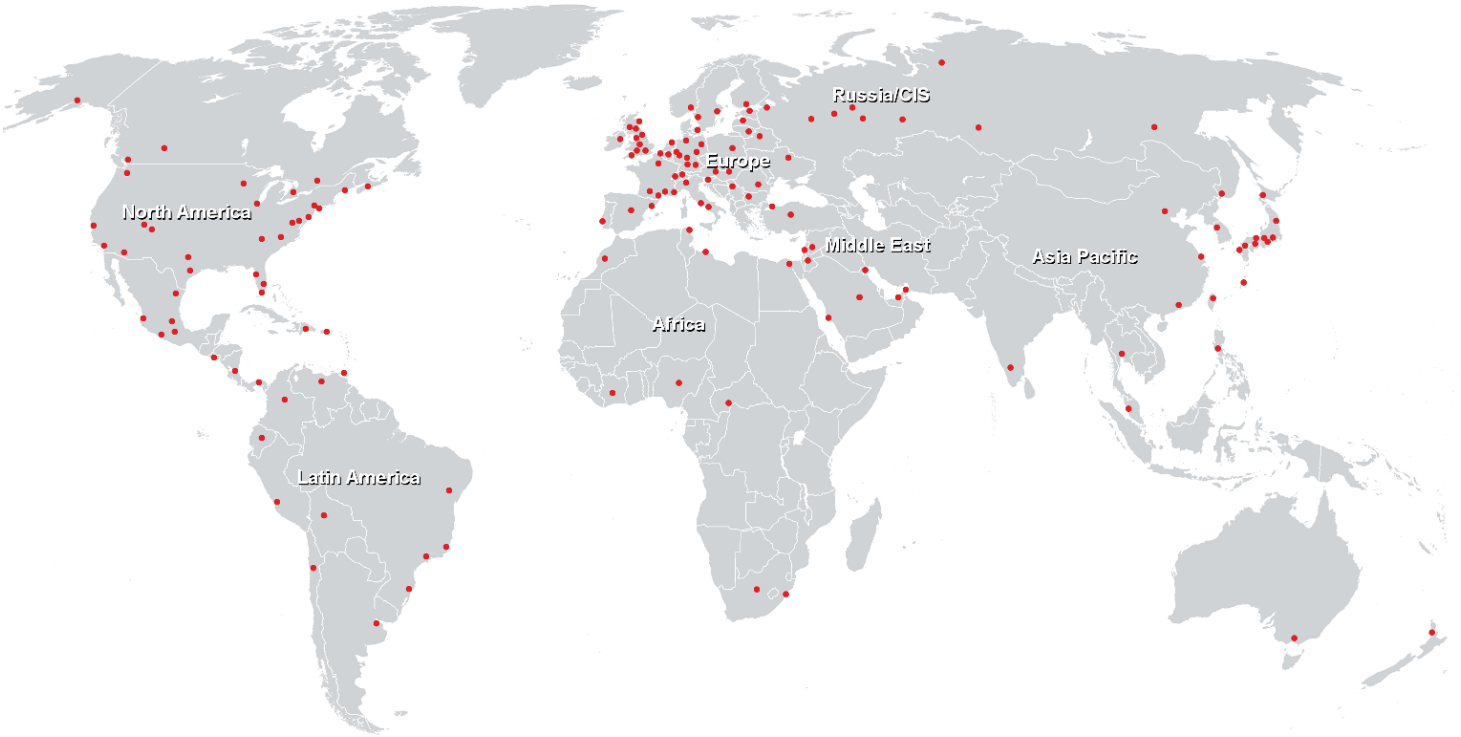

Course Content

The training is based on the curriculum of IREB® for the "CPRE Foundation Level". The main contents of the IREB Foundation trainings are:

- The basics of requirements engineering
- Understanding and limiting the context of requirements
- Eliciting requirements
- Documenting requirements, verbally and in the form of models
- Reviewing and coordinating requirements
- Administering requirements
- Planning tool support
